

Grade 11 Exit Level TAKS Mathematics—Objective 1

Understanding **functional relationships** is critical for algebra and geometry. Students need to understand that functions represent pairs of numbers in which the value of one number is dependent on the value of the other. This basic idea has major significance in areas such as science, social studies, and economics. From their understanding of functions, students should be able to communicate information using models, tables, graphs, diagrams, verbal descriptions, and algebraic equations or inequalities. Making inferences and drawing conclusions from functional relationships are also important skills for students because these skills will allow students to understand how functions relate to real-life situations and how real-life situations relate to functions. Mastering the knowledge and skills in Objective 1 at eleventh grade will help students master the knowledge and skills in other TAKS objectives in eleventh grade.

Objective 1 groups together the basic ideas of **functional relationships** included within the TEKS. The concepts of **patterns, relationships, and algebraic thinking** found in the lower grades form the foundation for Objective 1.

TAKS Objectives and TEKS Student Expectations

Objective 1

The student will describe functional relationships in a variety of ways.

A(b)(1) Foundations for functions. The student understands that a function represents a dependence of one quantity on another and can be described in a variety of ways.

- (A) The student describes independent and dependent quantities in functional relationships.
- (B) The student [gathers and record data, or] uses data sets, to determine functional (systematic) relationships between quantities.
- (C) The student describes functional relationships for given problem situations and writes equations or inequalities to answer questions arising from the situations.
- (D) The student represents relationships among quantities using [concrete] models, tables, graphs, diagrams, verbal descriptions, equations, and inequalities.
- (E) The student interprets and makes inferences from functional relationships.
