Williams, 1996 Using data from the 1991 IEA International Association for the Evaluation of Educational Achievement  
Reading Literacy Study a study compared United States fourth and ninth grade students to students in 32 other countries  
examined relationships between reading comprehension and aspects of family schooling and community and investigated the  
nature of reading instruction in American classrooms National samples of classes at the grade level containing the most 9  
year olds and 14 year olds were used A world average was constructed of the 18 participating nations that are also members  
of the Organization for Economic Cooperation and Development OECD Results indicated that 1 American fourth graders  
outperformed students from all other countries except Finland 2 American ninth graders performance was closely grouped  
with that of students from 15 other nations 3 in the United States White students read better than Black and Hispanic  
students 4 most groups of American students outperformed the OECD average 5 students whose parents did not finish high  
school read at about the same level as the OECD average at fourth grade but fell below the average in the ninth grade 6

The reader can place the U S in an international perspective compare the performance of the U S population with the  
performance of children in 32 other nations and thus evaluate our students against a world standard It looks at the reading  
comprehension skill of 4th graders the variation in these skills across various sub populations of students and the explanation  
for these variations according to what families teachers and schools do and provide Charts and tables      Reading  
Comprehension Research and Testing in the U.S. Arlette Ingram Willis, 2012-09-10 This book challenges traditional  
sanctioned and official histories of reading comprehension by examining how ideological and cultural hegemony work to  
reproduce dominant ideologies through education in general and reading comprehension research and testing specifically

Willis analyzes the ideological and cultural foundations that underpin concepts theories research tests and interpretations and connects these to the broader social and political contexts within U S history in which reading comprehension research and testing have evolved The reconstruction of a history of reading comprehension research and testing in this way demystifies past and current assumptions about the interconnections among researchers reading comprehension research and standardized reading comprehension tests A promising vision of the future of reading comprehension research and testing emerges one that is more complex multidimensional inclusive and socially just Reading Comprehension Research and Testing in the U S aims to revolutionize how reading comprehension is conceived theorized tested and interpreted for all children This is a critically relevant volume for educational researchers teacher educators school administrators teachers policy makers and all those concerned with school literacy and educational equity
