Päiviö Sjaunja, 2021-11-29 This open access book uses an interdisciplinary approach that not only focuses on social organization but also analyzes how societies and ecological settings were interwoven. How did early modern indigenous Sami inhabitants in interior northwest Fennoscandia build institutions for governance of natural resources? The book answers this question by exploring how they made decisions regarding natural resource management mainly with regard to wild game, fish and grazing land and illuminate how Sami users in a changing economy altered the long term rules for use of land and water in a self governance context. The early modern period was a transforming phase of property rights due to fundamental changes in Sami economy from an economy based on fishing and hunting to an economy where reindeer pastoralism became the main occupation for many Sami. The book gives a new portrayal of how proficiently and systematically indigenous inhabitants organized and governed natural assets and how capable they were in building highly functioning institutions for governance.
