

# SOCIAL CONTROL THEORY

Social Control Theory suggests that people are naturally inclined to engage in criminal behavior, and institutions like the family, schools, and the criminal justice system, work together to control individuals and prevent them from engaging in deviant behavior.

## SOCIAL BONDS

Individuals who have strong bonds and relationships with others are less likely to engage in deviant or criminal behavior. These bonds may be with family members, friends, school, or other social institutions. Social bonds create a sense of belonging and attachment, which provides individuals with a stake in conforming to societal norms and values.

## CONTROL

2. **Informal:** social norms, values, customs, traditions, and peer pressure. Enforced by informal means, such as social disapproval, ridicule, or exclusion from groups.

theory and research since the 1969 publication of Hirschi's seminal work on the social bond. Social control and self control theorists are unique in suggesting that patterns in criminal behaviors are better explained by variations in social constraints rather than by individual motivational impulses, thus indicating that their main concerns are the explication and clarification of the techniques, processes, and institutions of informal social control. The four major sections of this volume focus on the similarities and differences among the major contributors to the early developmental stage of social control theory; the central importance of parents, peers, and schools in the creation of informal control mechanisms and their link to crime and delinquency; the theoretical underpinnings of self control theory, including empirical tests and criticisms; and theoretical integrations of social control and self control theories with various motivational theories of crime and delinquency.
