Social Skills Rating Scale Manual:

Social Skills Training Manual Jill Wilkinson, Sandra Canter, 1982 **Social Behavior and Skills in Children** Johnny L. Matson, 2009-09-18 That children are capable of pathology not only such conditions as ADHD and learning disabilities but also such adult disorders as anxiety and depression stands as a defining moment in psychology's recent history. Within this recognition is the understanding that the social skills deficits that accompany these disorders must be targeted for assessment and treatment to ensure optimal functioning in school with peers and in later transitions to puberty and adulthood. **Social Behavior and Skills in Children** cuts across disciplinary lines to clarify the scope of assessment options and interventions for a wide range of disorders. A panel of leading scholars reviews current research, discusses social deficits unique to specific disorders, and identifies evidence-based best practices in one authoritative, approachable reference. This volume discusses theoretical models of social skills as they relate to assessment and treatment. Analyzes the etiology of social behavior problems in children and the relation between these problems and psychopathology. Reviews 48 norm-referenced measures of social skills in children. Examines the range of evidence-based social skills interventions. Addresses challenging behaviors such as aggression and self-injury. Focuses on specific conditions including developmental disabilities, conduct disorders, ADHD, chronic medical illness, depression, anxiety, and severe psychopathology. **Social Behavior and Skills in Children** is an essential reference for university libraries as well as a must-have volume for researchers, graduate students, and clinicians in child and school psychology, special education, and other related fields.

Practitioner's Guide to Empirically Based Measures of Social Skills Douglas W. Nangle, David J. Hansen, Cynthia A. Erdley, Peter J.

Norton, 2009-12-16 Social skills are at the core of mental health so much so that deficits in this area are a criterion of clinical disorders across both the developmental spectrum and the DSM. The Practitioner's Guide to Empirically Based Measures of Social Skills gives clinicians and researchers an authoritative resource reflecting the ever-growing interest in social skills assessment and its clinical applications. This one-of-a-kind reference approaches social skills from a social learning perspective, combining conceptual background with practical considerations and organized for easy access to material relevant to assessment of children, adolescents, and adults. The contributors' expert guidance covers developmental and diversity issues and includes suggestions for the full range of assessment methods so readers can be confident of reliable, valid testing leading to appropriate interventions. Key features of the Guide: An official publication of the Association for Behavioral and Cognitive Therapies. Describes empirically based assessment across the lifespan. Provides in-depth reviews of nearly 100 measures, their administration and scoring, psychometric properties, and references. Highlights specific clinical problems including substance abuse, aggression, schizophrenia, intellectual disabilities, autism spectrum disorders, and social anxiety. Includes at-a-glance summaries of all reviewed measures. Offers full reproduction of more than a dozen measures for children, adolescents, and adults, e.g., the Interpersonal Competence Questionnaire and the Teenage Inventory of Social Skills.

As social skills assessment and training becomes more crucial to current practice and research the Practitioner s Guide to Empirically Based Measures of Social Skills is a steady resource that clinicians researchers and graduate students will want close at hand **Social Skills Improvement System** Frank M. Gresham,2008 The Social Skills Improvement System addresses the need for an evidence based multi tiered assessment and intervention system to help you help students develop improve and maintain important social skills Designed by experienced scientist practitioners Stephen Elliott PhD and Frank Gresham PhD this family of tools can be used early in the school year to facilitate the universal screening of students at risk for academic or social behaviour difficulties help plan interventions for improving these behaviours and evaluate progress on targeted skills after intervention The SSIS focuses on key skills that enable the academic success of students 3 19 years of age Teacher parent and student forms help provide a comprehensive picture across school home and community settings
