## Our Core Values: Quality, Safety, Environmental Care

The vision and values that Volvo Penta engineers use when designing the products are what make the products unique. These are very beginning, safety and quality have always been the focus of the development of all of our products, processes, and services. It is on these values and qualities that the Volvo Penta corporate identity, international and legal status have been founded. Today's core values of quality, safety, and service are the environmental values central to Volvo Penta. These important values facilitate a company and culture ultimately helping us to surpass

Quality is a value that traditionally referred to product quality but now encompasses all aspects of our products and services. In today's competitive environment, Volvo Penta's quality commitment extends beyond traditional manufacturing and engineering, impacting its entire care for the customer throughout the life of the product.

Safety will always be our most distinguishing core value. Safely produced in the quality of all our products, it also encompasses personal, family, human, and environmental values.

Environmental Care is an aspiration. It is through its production, distribution, service, and recycling, to be integral part of the Volvo Penta commitment. Towards customers, employees, and the community, the company is the environmental care core value. Volvo Penta maintains the understanding of the environmental impact its products have upon nature and the human culture and moral surroundings.

Volvo Penta continually considers a considerable part of its development resources toward minimizing the environmental impact of its products. Examples of areas where we are always working for improvements are reduced emissions, noise levels, and fuel consumption.

Regardless of whether your Volvo Penta engine is installed in a boat used for pleasure or commercial operation, correct operation of engine maintenance of the engine will result in disturbance or damage to the environment.

In this owner's manual there are a number of service schedules, which, if not followed, will result in an increase in the engine's repair cost. This environment will be running costs and a reduction in service life. Always observe recommended service intervals and make a habit of checking that the engine is operating normally every time you use it. Contact an authorized Volvo Penta dealer if you cannot correct the fault yourself.

Remember that most chemicals used on boats are harmful to the environment if used incorrectly. Volvo Penta recommends the use of biodegradable degreasing agents for all cleaning. Always dispose of engine and transmission oil, waste oil, paint, degreasing agents and cleaning liquids etc. at proper disposal areas so that they do not harm the environment.

Always respect and observe during your boat trips air that boat and noise generated by the boat do not disturb or harm wildlife, seabirds, turtles etc. When offloading your boat or engine, please take consideration and always leave the areas you visit as you would like to find them yourself.
