

SNIP Literacy Programme 1

Introduction

Phil and Carol Smart are both qualified dyslexic tutors. They were both classroom teachers for many years before specialising in addressing the barriers to learning experienced by children and young people. Together they have taught many hundred of pupils who struggled with literacy and during this time, have used a wide range of different interventions to promote success. The need to locate a programme that was the "best fit" in meeting the needs of pupils with literacy difficulties, resulted in development of a resource that:

- ⊗ Had a rapid success rate,
- ⊗ Was practical in its delivery,
- ⊗ Was enjoyed by pupils.

What is the programme?

The programme is aimed at increasing reading and spelling and uses the primary high frequency words (HFW). These words are grouped by selecting those that visually look different to each other. It is felt that this programme is appropriate for pupils of 8+ with standardised literacy scores of 80 or less, who have already been exposed to effective phonic/literacy teaching but are still struggling. The programme approaches literacy acquisition at the word level and addresses the gaps in phonics knowledge through the application of analytic phonics (drawing pupils' attention to the make up of words as they break up the target word).

What is its rationale?

Our experience as dyslexic tutors has taught us that:

- ⊗ Many pupils who required support were already familiar with sound/symbol relationships. They could say the sound represented by symbol, although often struggled with more complex diagraphs and were unable to blend the individual sounds into a word or pronounce it correctly.
- ⊗ Some of these difficulties appeared to be related to underlying depleted auditory skills in perception, discrimination, memory etc.
- ⊗ Phonic programmes were the most common strategy that had been used to remediate their literacy deficits. We wanted something that was different and had quick and measurable results to persuade pupils it was worth giving a try!
- ⊗ Structured and cumulative phonic programmes take a long time to have an impact on reading and spelling accuracy. This rate of improvement is not likely to have a positive impact on a pupil's self esteem.
- ⊗ The SNIP programme provides a high level of over-teaching – absolutely key to ensuing recognition and fluency.
- ⊗ We grouped words so that they were not phonically similar. When we were originally using phonic groupings, our pupils quickly learned that they only had to listen for the first sound and then copy the rest of the word as in, night, right, light etc – no useful learning was taking place there. We remain grateful for all that our pupils taught us!
- ⊗ Our time with pupils was often short. For the majority we spent 1 x 40 mins a week with them. If their needs were substantial, then for a few we had 2 x 40 mins – this was in the main for pupils with statements who were performing on the first percentile. This is very little time to improve literacy, particularly if the problems were in both reading and
