The Origin and Evolution of Cultures Los Angeles Robert Boyd Professor of Anthropology University of California,Davis Peter J. Richerson Professor of Environmental Science and Policy University of California,2004-12-22 Oxford presents in one convenient and coherently organized volume 20 influential but until now relatively inaccessible articles that form the backbone of Boyd and Richerson s path breaking work on evolution and culture Their interdisciplinary research is based on two notions First that culture is crucial for understanding human behavior unlike other organisms socially transmitted beliefs attitudes and values heavily influence our behavior Secondly culture is part of biology the capacity to acquire and transmit culture is a derived component of human psychology and the contents of culture are deeply intertwined with our biology Culture then is a pool of information stored in the brains of the population that gets transmitted from one brain to another by social learning processes Therefore culture can account for both our outstanding ecological success as well as the maladaptations that characterize much of human behavior The interest in this collection will span anthropology psychology economics philosophy and political science **Qualitative Research Methods for the Social Sciences** Bruce Lawrence Berg,2007 This volume offers a comprehensive and straightforward coverage of doing qualitative research The central purpose of this book is to instruct inexperienced researchers in ways of collecting organizing and making sense of qualitative data **The Origin and Evolution of Cultures** Robert Boyd,Peter J. Richerson,2005 The Origin and Evolution of Cultures presents articles based on two notions That culture is crucial for understanding human behaviour and that culture is part of biology Interest in this collection will span anthropology psychology economics philosophy and political science

,1997 *Evolution* Leonid E. Grinin, Andrey V. Korotayev, David J. LePoire, David Christian, David Baker, Craig G. Benjamin, Alexander V. Markov, Alexander D. Panov, Olga A. Sorokina, Rendt Gorter, Michael Charles Tobias, Jane Gray Morrison, Ilya V. Ponomariov, Valentina M. Bonda-renko, Vasily N. Vasilenko, Anton L. Grinin, 2015-11-16 The present volume is the fourth issue of the Yearbook series entitled *Evolution*. The title of the present volume is *From Big Bang to Nanorobots*. In this way we demonstrate that all phases of evolution and Big History are covered in the articles of the present Yearbook. Several articles also present the forecasts about future development. The main objective of our Yearbook as well as of the previous issues is the creation of a unified interdisciplinary field of research in which the scientists specializing in different disciplines could work within the framework of unified or similar paradigms using the common terminology and searching for common rules, tendencies and regularities. At the same time for the formation of such an integrated field one should use all available opportunities, theories, laws and methods. In the present volume a number of such approaches are used. The volume consists of four sections: *Universal Evolutionary Principles*, *Biosocial Evolution*, *Ecological Aspects* and *Consciousness Projects for the Future*. *In Memoriam* This Yearbook will be useful both for those who study interdisciplinary macroproblems and for specialists working in focused directions as well as for those who are interested in evolutionary issues of Cosmology, Biology, History, Anthropology, Economics and other areas of study. More than that this edition will challenge and excite your vision of your own life and the new discoveries going on around us. [The Social Experience](#) James Wilfrid Vander Zanden, 1988
