

VOLVO PENTA INBOARD DIESEL

D6-435

SOND-KAY 14356 inpt continuous power acc. to ISO 8608

Diesel performance for marine use

Volvo Penta's 6-cylinder D6-435 is developed from the latest designs in modern diesel technology. The engine has common rail fuel injection system, double overhead camshafts, 4 valves per cylinder, turbocharger and aftercooler. Together with a large swept volume and the EVC system (Electronic Vessel Control), this results in world-class diesel performance, combined with low emissions.

World-class performance

The common rail fuel injection system, controlled by EVC, in combination with a large swept volume, ensures outstanding torque during the acceleration, with virtually no sign of torque. This matched with the engine's high load carrying capability creates a sporty feeling and power, when needed.

Compact and robust

The engine is lightweight and extremely compact for its large swept volume and high output. With the integrated transmission, driving the high-pressure injection pump and the camshafts, a high degree of integrated systems, a high efficiency aftercooler, a monolithic performed with very few hoses, and a fully symmetrical engine, the package simply goes that compact.

The rigid cast iron cylinder block and head, ladder frame, and exactly centred (up to three stages) fuel injection gives excellent inboard comfort with low noise and vibration levels.

EVC-ID

EVC-ID, a new generation of the proven Electronic Vessel Control offers the best driver experience available.

The new ergonomically designed control interface smoothly and safely for the measuring with fingertip precision in any direction. Integrated pushbuttons give easy access to functions such as Low Speed, Cruise Control and Single Lever Control, which allows for safe and easy boating.

Complete the trailer with your choice from the full range of easy-to-read gauges and displays including the new 7" color display. Add the trip computer function for accurate fuel management and minimised environmental impact. Engine synchronization is off course standard in twin installations.

A propulsion package fully matched, tested and supported by one company

Volvo Penta's hydraulically shifted reverse gear has been specifically developed with a view to increasing the standard of comfort and tested.

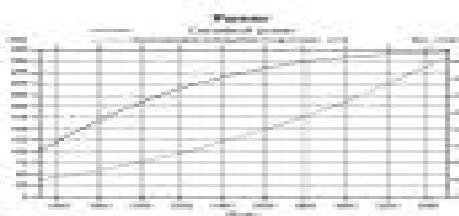

Matched with the characteristics of the D6 engine, the hydraulic shifting mechanism and a gear technology that uses boost gears throughout the gear train, we have developed a complete package for high torque, operational reliability and reduction of engine noise and vibrations.

The combination of 15° down angle, large drop center and small dimensions provides for optimised installations. All drives are after available.

In order to get full benefit of the EVC system the reverse gear is equipped with electric shifting valves.

Meeting new emission standards

The common rail injection system in combination with electronics and an advanced combustion system are setting new standards in minimizing noxious emissions and particulates. The engine complies with IMO Tier II limits and the comprehensive emission requirements EU RCD and US EPA Tier 2.
