Integrating Gender Equality into Business and Management Education Patricia M. Flynn,Kathryn Haynes,Maureen A. Kilgour,2017-09-08 This volume addresses the need to integrate gender equality into business and management education and provides examples of leading initiatives illustrating how this can occur from various disciplinary and global perspectives

Gender inequality has a long history in business schools and the workplace and traditions are hard to change. Some disciplines remain resolutely gendered affecting both women and men and case materials on women leaders and managers are still rare. The chapters provide conceptual and research rationales as to why responsible management education must address the issue of gender equality. They also identify materials and resources to assist faculty in integrating gender issues and awareness into various disciplines and fields. These include specific case studies and innovations that assess or address the role of gender in various educational environments. The book is designed to help faculty integrate the topic of gender equality into their own teaching and research and gain support for the legitimacy of gender equality as an essential management education topic. This is the first book in a series on gender equality as a challenge for business and management education published with the Principles of Responsible Management Education PRME Working Group on Gender Equality.

*The Uses of Social Investment* Anton Hemerijck, 2017-05-26. The Uses of Social Investment provides the first study of the welfare state under the new post crisis austerity context and associated crisis management politics to take stock of the limits and potential of social investment. It surveys the emergence diffusion limits merits and politics of social investment as the welfare policy paradigm for the 21st century seen through the lens of the life course contingencies of the competitive knowledge economy and modern family hood. Featuring contributions from leading scholars in the field the volume revisits the intellectual roots and normative foundations of social investment surveys the criticisms that have leveled against the social investment perspective in theory and policy practice and presents empirical evidence of social investment progress together with novel research methodologies for assessing socioeconomic rates of return on social investment. Given the progressive admittedly uneven diffusion of the social investment policy priorities across the globe the volume seeks to address the pressing political question as to whether the social investment turn is able to withstand the fiscal austerity backlash that has re emerged in the aftermath of the global financial crisis.
