Augmented Images Lars C. Grabbe, Patrick Rupert-Kruse, Norbert M. Schmitz, 2022-09-07 Common boundaries between the physical reality and rising digital media technologies are fading The age of hyper reality becomes an age of hyper aesthetics Immersive media and image technologies like augmented reality enable a completely novel form of interaction and corporeal relation to and with the virtual image structures and the different screen technologies Augmented Images contributes to the wide range of the hyper aesthetic image discourse to connect the concept of dynamic augmented images with the approaches in modern media theory philosophy perceptual theory aesthetics computer graphics and art theory as well as the complex range of image science This volume monitors and discusses the relation of images and technological evolution in the context of augmented reality within the perspective of an autonomous image science [Image Temporality](#) Lars C. Grabbe, Patrick Rupert-Kruse, Norbert M. Schmitz, 2017-11-17 Media technology plays a significant role in addressing the different sense modalities of the recipient or user This role seems to deeply influence our concepts of time and space The

more a media technology is becoming a trigger for sensory and perceptual experiences the bigger is the influence on temporality and spatiality Image Temporality could be one part of the temporality discourse to connect the concepts of static and dynamic images with the approaches in modern media theory philosophy of mind perceptual theory aesthetics and film studies as well as the complex range of image science This volume monitors and discusses the relation of time space and visual media within the perspective of an autonomous image science

Mixed Reality Images Lars C. Grabbe, Patrick Rupert-Kruse, Norbert M. Schmitz, 2025-02-25 The interplay of physical reality and digital media technologies is getting enhanced by new interfaces The age of hyper reality turns into the age of hyper aesthetics and immersive image technologies like mixed reality enable a completely novel form of interaction and user relation with the virtual image structures the different screen technologies and embedded physical artefacts for interaction Mixed Reality Images contributes to the wide range of the hyper aesthetic image discourse to connect the concept of mixed reality images with the approaches in modern media theory philosophy perceptual theory aesthetics computer graphics and art theory as well as the complex range of image science This volume monitors and discusses the relation of images and technological evolution in the context of mixed reality within the perspective of an autonomous image science

Image Evolution Lars C. Grabbe, Patrick Rupert-Kruse, Norbert M. Schmitz, 2019-01-23 The history of images can be described as a history of technology and mediality The development of images is deeply rooted in the potentials of media technologies and the numerous human inventions in the range of traditional craftsmanship engineering science computer science and art and design The factual embedding of images in the historical technological processes constitutes a complex structure of an autonomous image evolution that must be highlighted characterized and analyzed by the interdisciplinary academic discourses that are related to the functions and structures of visibility pictoriality and forms of multi sensoric representations The chosen term evolution is deliberately indicating structural laws that underlie historical events These laws are intentional and logical processes of a historical and technological interdependency In this interdependency technology is evolving out of its inherent structures and additionally embedded in anthropological conditions and sociocultural dynamics In this context we should work with the concept of an image evolution
