Tate, 2022-10-27 With newly updated research the second edition of this bestseller provides parents and educators with strategies for building a brain compatible environment where young learners can develop the skills they need to be successful **The Best of Corwin: Educational**

Neuroscience David A. Sousa, 2011-09-20 Learn about the brain from some fine minds in education The Best of Corwin series showcases key chapters from critically acclaimed Corwin publications for a powerful compilation of perspectives on important education issues and topics Featuring the works of recognized pioneers in the nascent field of educational neuroscience this cutting edge collection show show to apply current brain research to teaching and learning The book is divided into three parts The Developing Brain The Brain in School and Instructional Strategies for Every Brain Chapter topics include Brain structures and development from birth through adolescence What causes the brain to pay attention and remember How the brain learns to read and calculate Differences between the male and female brain The social and academic needs of students with learning difficulties Strategies for keeping students brains engaged focused and energized Teachers are brain changers and knowing more about how the brain learns can only make you more successful at reaching and engaging young minds

Worksheets Don't Work David A. Daffern, 2020-03-14 Too many students today suffer from excessive worksheet usage Motivation dries up and deep learning flies out the window when teachers lean too heavily on worksheets For teachers to make learning stick they need to align their instructional practices more closely with how their students brains best learn To best encode new learning into long term memory students must somehow meaningfully interact with and make meaning of the information It must make sense to them and connect to their prior knowledge if they have any chance of remembering it later To assist with that this book uses the word worksheets as an acrostic and supplies ten different types of alternatives that teachers can use to replace them word work options reflections kaleidoscope synthesis human interaction extended response energy and movement thought organizers and scaffolding Each type of alternative as five different learning tasks that are highly engaging and that promote deep learning With these 50 ideas to replace worksheets students never need to be bored in class again
