Understanding Media Psychology Gayle S. Stever, David C. Giles, J. David Cohen, Mary E. Myers, 2025-07-23 Understanding Media Psychology is an authoritative introductory textbook on the growing field of media psychology

Providing an overview of topics in the field it summarizes key concepts and theories and considers the importance of media psychology in today's society. The second edition of this bestselling textbook has been fully updated to reflect the changing landscape of media psychology. The new edition features a brand new chapter on news and political media as well as increased focus on AI and new forms of social media. It covers core areas such as positive media psychology, audience research and the effect of gaming, violence, advertising and pornography, critically engaging with contemporary discussions around propaganda, fake news, deepfakes and how media and health psychology interacted during the COVID-19 pandemic and beyond. Written by a team of expert authors, this book will help readers understand the structures, influences and theories around media psychology. Particular care is also given to addressing the interaction between issues of social justice and the media as well as the effects media has on both the members of marginalized groups and how those groups are perceived. A student website and instructor resources provide further ways to engage with the content and support teaching and learning. Containing a range of pedagogical features throughout to aid teaching and student learning, including vocabulary and key terms, discussion questions and boxed examples, this is an essential resource for media psychology courses at the undergraduate and introductory master's levels globally.

This unique work introduces the basic principles of artificial intelligence with applications in geographical teaching and research, GIS and planning. Written in an accessible, non-technical and witty style, this book marks the beginning of the AI revolution in geography with major implications for teaching and research. The authors provide an easy-to-understand basic introduction to AI relevant to geography. There are no special mathematical and statistical skills needed; indeed, these might well be a hindrance. AI is a different way of looking at the world and it requires a willingness to experiment and readers who are unhindered by the baggage of obsolete technologies and outmoded philosophies of science will probably do best. The text provides an introduction to expert systems, neural nets, genetic algorithms, smart systems and artificial life and shows how they are likely
