Social Engineering Robert W. Gehl, Sean T. Lawson, 2022-03-08 Manipulative communication from early twentieth century propaganda to today s online con artistry examined through the lens of social engineering The United States is awash in manipulated information about everything from election results to the effectiveness of medical treatments Corporate social media is an especially good channel for manipulative communication with Facebook a particularly willing vehicle for it In *Social Engineering* Robert Gehl and Sean Lawson show that online misinformation has its roots in earlier techniques mass social engineering of the early twentieth century and interpersonal hacker social engineering of the 1970s converging today into what they call masspersonal social engineering As Gehl and Lawson trace contemporary manipulative communication back to earlier forms of social engineering possibilities for amelioration become clearer The authors show how specific manipulative communication practices are a mixture of information gathering deception and truth indifferent statements all with the instrumental goal of getting people to take actions the social engineer wants them to Yet the term fake news they claim reduces everything to a true false binary that fails to encompass the complexity of manipulative communication or to map onto many of its practices They pay special attention to concepts and terms used by hacker social engineers including the hacker concept of bullshitting which the authors describe as a truth indifferent mix of deception accuracy and sociability They conclude with recommendations for how society can undermine masspersonal social engineering and move toward healthier democratic deliberation

Automated Secure Computing for Next-Generation Systems Amit Kumar Tyagi,2023-12-19

AUTOMATED SECURE COMPUTING FOR NEXT GENERATION SYSTEMS This book provides cutting edge chapters on machine empowered solutions for next generation systems for today s society Security is always a primary concern for each application and sector In the last decade many techniques and frameworks have been suggested to improve security data information and network Due to rapid improvements in industry automation however systems need to be secured more quickly and efficiently It is important to explore the best ways to incorporate the suggested solutions to improve their accuracy while reducing their learning cost During implementation the most difficult challenge is determining how to exploit AI and ML algorithms for improved safe service computation while maintaining the user s privacy The robustness of AI and deep learning as well as the reliability and privacy of data is an important part of modern computing It is essential to determine the security issues of using AI to protect systems or ML based automated intelligent systems To enforce them in reality privacy would have to be maintained throughout the implementation process This book presents groundbreaking applications related to artificial intelligence and machine learning for more stable and privacy focused computing By reflecting on the role of machine learning in information cyber and data security Automated Secure Computing for Next Generation Systems outlines recent developments in the security domain with artificial intelligence machine learning and privacy preserving methods and strategies To make computation more secure and confidential the book provides ways to experiment conceptualize and theorize about issues that include AI and machine learning for improved security and preserve privacy in next generation based automated and intelligent systems Hence this book provides a detailed description of the role of AI ML etc in automated and intelligent systems used for solving critical issues in various sectors of modern society Audience Researchers in information technology robotics security privacy preservation and data mining The book is also suitable for postgraduate and upper level undergraduate students
