Values In Global Administrative Law:

Values in Global Administrative Law Gordon Anthony, Jean-Bernard Auby, John Morison, Tom Zwart, 2011-02-14 Global Administrative Law has recently emerged as one of the most important contemporary fields in public law scholarship. Concerned with developing fuller understandings of patterns in global governance, it represents one of the most insightful ways of viewing the multifarious forms of public power that now exist beyond the State. The present collection brings together some of the leading scholars working in the field of global administrative law to address past and future challenges related to global governance. Each of the contributions picks up on the more general theme of the values that do or should inform global administrative law, and the book in this way provides a novel and thought provoking commentary on this most engaging area of debate. Values in Global Administrative Law will be of interest to public lawyers, social and political scientists and scholars of international relations. It will also be an invaluable resource for undergraduate and postgraduate courses that touch partly or exclusively on the challenges of global governance.

Patents and Global Administrative Law David Tilt, 2025-07-18 The book applies values and concepts from Global Administrative Law (GAL) to international patent law, demonstrating how limiting technocratic and overly economic language can be. Highlighting the administrative foundations of patent law, the book argues that in its international form it can be analysed using the same principles of participation, transparency and accountability found in national administrative law. At the heart of the book is a simple question: What does international patent law look like when we approach it through the lens of these values? What is being left out when patent law is described predominantly in terms of its technical legal provisions or economic impact? The book presents three interrelated contexts: EU patent law, bilateral trade agreements and the multilateral space. Modern patent law is increasingly discussed in terms of national competitiveness or economic potential, which reveals only a narrow understanding of how patent law evolves and functions. The vocabulary of administrative law provides a fresh way of recasting, reframing and re-describing the dynamics of international patent law in a way that is more accessible to those outside of a traditional patent scholarship audience. A fundamental objective of the book is to challenge the tendency towards technocratic isolation in patent law. The book uses accessible vocabulary and represents a new way of conceptualising and understanding how patent law develops on a global scale. The book will be of interest to researchers in the field of patent law, international law and administrative law.

UK, EU and Global Administrative Law Paul

Craig, 2015-10-26 A detailed analysis of the foundations and challenges of UK EU and global administrative law Global Administrative Law Carol Harlow, 2010 There is currently much interest in the question whether a global administrative law is coming into being and if so whether this is desirable or otherwise This paper addresses the question of principles for a global administrative law It considers four potential sources and their suitability as a foundation for a global administrative law system first the largely procedural principles that have emerged in national administrative law systems notably the principle of legality and due process principles Section 3 second the set of rule of law values promoted by proponents of free trade and economic liberalism Section 4 third the good governance values and more particularly transparency participation and accountability promoted by the World Bank and International Monetary Fund Section 5 and finally human rights values Section 6 The paper ends on a sceptical note concluding that a universal set of administrative law principles is difficult to identify and not especially desirable First administrative law is primarily a Western construct protective of Western interests It may impact unfavourably on developing economies Secondly the evolution of global administrative law in adjudicative forums is leading to an undesirable juridification of the political process The paper concludes that diversity and pluralism are preferable **Multilateral Environmental Agreements and Compliance** Anna Huggins, 2017-11-27 The adoption of administrative procedures in global governance has the potential to foster proper consideration of marginalized actors interests yet risks entrenching the dominance of the well resourced and powerful Accordingly this book proposes a new framework for evaluating the extent to which administrative procedures in the compliance systems of multilateral environmental agreements constrain power and promote regard for the interests of affected states which are frequently developing and transition countries This framework is applied to the compliance systems under the Montreal Protocol the Kyoto Protocol and CITES which address critical global environmental issues of ozone layer depletion climate change and trade in endangered species respectively The analysis shows that under certain conditions administrative procedures limit the influence of states asymmetric power on compliance deliberations Furthermore systematic adoption of these procedures increases the opportunities for affected states interests to be voiced and considered in compliance decision making processes

Current Legal Problems 2010 George Letsas, Colm O'Connell, 2011-01-30 This year's volume covers topics such as military detention English criminal law terrorism democracy human rights civil liberties the media and international law family law child welfare health feminism economic theory corporate law competition regulation contract law biotechnology biodiversity and more The Oxford Handbook of Global Policy and Transnational Administration Diane Stone, Kim Moloney, 2019-01-10 Global policy making is unfurling in distinctive ways above traditional nation state policy processes New practices of transnational administration are emerging inside international organizations but also alongside the trans governmental networks of regulators and inside global public private partnerships Mainstream policy and public administration studies have tended to analyse the capacity of public sector hierarchies to globalize national policies By

contrast this Handbook investigates new public spaces of transnational policy making the design and delivery of global public goods and services and the interdependent roles of transnational administrators who move between business bodies government agencies international organizations and professional associations This Handbook is novel in taking the concepts and theories of public administration and policy studies to get inside the black box of global governance Transnational administration is a multi actor and multi scalar endeavour having manifestations depending on the policy issue or problems at the local urban sub regional sub national regional national supranational supra regional transnational international and global scales These scales of local and global are not neatly bounded and nested spaces but are articulated together in complex patterns of policy activity These transnational patterns represent a reinvigoration of public administration and policy studies as the Handbook authors advance their analysis beyond the methodological nationalism of the nation state
