

The image is a collage of various photographs and illustrations. At the top, a person is shown from the back, sitting at a desk and working on a computer. The screen displays a landscape with a large, semi-transparent text overlay that reads 'KNOWLEDGE'. In the foreground, two hands are shown working on a large sheet of paper with various diagrams, charts, and data. The paper is covered with a grid of colored squares (a color palette) and several line graphs. Behind the hands, there is a stack of books and papers. A desk lamp is positioned above the workspace. The background is a dark, textured surface, possibly a chalkboard or a wall with a map. The overall theme is the creation and application of knowledge through research and data analysis.

**EBOOK: Working Knowledge** Colin Symes, John McIntyre, 2002-11-16 a rich inter weaving of carefully articulated critical stances It is impossible in a short review to do justice to the quality and variety of all these perspectives The result is strong coverage of the territory set out in the title in ways that many working in the field will find valuable Phil Hodkinson Journal of Education for Teaching Universities are undergoing a series of profound changes One of the more pronounced of these involves the partnerships that are now being formed between business enterprises and higher education The emergence of these partnerships has much to do with the changing economy which is increasingly based around knowledge and information the traditional stock in trade of the university Knowledge capitalism has given a renewed impetus to higher education One expression of this is work based learning which challenges the scope and site of the university curriculum This book analyses this development from a number of perspectives critical historical philosophical sociological and pedagogical Its various contributors argue that work based approaches contain much that is challenging to the university and also much that could help to create new frameworks of learning and new roles for academics Working Knowledge offers a comprehensive examination of the new vocationalism in higher education
