Michael Dunn, 2025-07-01 Technology is supposed to make life easier but for many it feels like the machines are winning. Computers crash at the worst time, printers refuse to print, Wi-Fi drops without warning and error messages read like ancient riddles. *Help My Computer Is Smarter Than Me* is the no-nonsense survival guide for anyone who has ever wanted to throw their device out the window. Michael Dunn takes readers through the everyday tech struggles most people face from confusing updates to password chaos with humor and plain language. Instead of jargon, he offers digital street smarts, simple checklists and repeatable routines that keep panic at bay. Along the way he explains why technology behaves the way it does and how to keep it working without losing your sanity. This book is not about turning you into an engineer. It is about giving you confidence, patterns you can rely on and the ability to laugh at the absurdity while getting your work done. With this guide in hand you will learn how to tame your devices, dodge common traps and finally feel like you are the one in control.
