assessment of academic quality was fueled by the very institutions of higher education they now judge. While the purpose and design of academic quality rankings has evolved during the century since their creation, their history teaches one clear lesson: college rankings fill a strong consumer demand for information about institutional quality and as such are here to stay for the foreseeable future. Various approaches to college rankings have different benefits and each is subject to legitimate criticism, all of which should be seriously considered in light of the powerful effects that a widely distributed ranking can have on institutions of higher education and the students seeking to enter them. Sections II and III will explore these aspects of college rankings respectively. In light of the historical lessons revealed in Section I, however, movements that seek to reform college rankings should be focused on producing better rankings rather than on trying to eliminate or ignore them. Section IV will survey multiple new indicators of academic quality that many view as potential improvements over the indicators upon which current college rankings are based. Contains 2 figures, 6 tables and 116 endnotes.
