## College Rankings Gmail Prices:

**Robin Hood Math** Noah Giansiracusa,2025-08-05 How the rich and powerful use math to exploit you and what you can do to beat them at their own game Everything we do today is recorded as data that s sold to the highest bidder Plugging our personal data into impersonal algorithms has made government agencies more efficient and tech companies more profitable But all this comes at a price It s easy to feel like an insignificant number in a world of number crunchers who care more about their bottom line than your humanity It s time to flip the equation turning math into an empowering tool for the rest of us Award winning mathematician Noah Giansiracusa explains how the tech giants and financial institutions use formulas to get ahead and how anyone can use these same formulas in their everyday life You ll learn how to handle risk rationally make better investments take control of your social media and reclaim agency over the decisions you make each day In a society that all too often takes from the poor and gives to the rich math can be a vital democratizing force Robin Hood Math helps you to think for yourself act in your own best interests and thrive *Value First then Price* Andreas Hinterhuber,Todd C. Snelgrove,2016-10-04 Winner of the Overall Case Award 2014 The Case Centre best selling case 2013 2017 Value based pricing pricing a product according to its value to the customer rather than its cost is the most effective and profitable pricing strategy Buyers need to evaluate the monetary benefits of a product against the price of its competitors Sellers justify their price points through documenting the value of a product emphasising its superiority against competitors and therefore justifying the premium price Value First then Price is an innovative collection which proposes a quantitative methodology to value pricing and road tests this methodology through a wide variety of real life industrial cases It provides a state of the art and best practice overview of how leading companies quantify and document value to customers In doing so this book provides researchers with a method by which to draw invaluable data driven conclusions and sales and marketing managers the theories and best practices they need to quantify the value of their products to demanding hard nosed industrial purchasers With contributions from global industry experts this book provides cutting edge research on value quantification and value quantification capabilities with real life practical examples It will be essential reading for sales and pricing specialists as well as business strategists in both research and practice *Advances in Communication and Applications* L. M. Patnaik,Ravikumar G. K.,N. H. Prasad,2025-07-29 This book contains the proceedings of the International Conference on Emerging Research in Computing Information Communication and Applications ERCICA 2024 The conference serves as an interdisciplinary platform for researchers professional engineers scientists educators and technologists to discuss debate and promote advancements in research and technology across various emerging fields Topics covered include the Internet of Things IoT wireless communications image and video processing parallel and distributed computing and smart grid applications among others The book explores these emerging research areas making it a valuable resource for both researchers and practicing engineers Type-2 neutrosophic number based multi-attributive border approximation area

comparison (MABAC) approach for offshore wind farm site selection in USA Muhammet Deveci, Nuh Erdogan, Umit Cali, Joseph Stekli, Shuya Zhong, This approach combines the advantages of neutrosophic numbers sets which can utilize uncertain and incomplete information with a multi attributive border approximation area comparison that provides formulation flexibility and easy calculation Further this study develops and integrates a techno economic model for OWFs in the decision making A case study is performed to evaluate and rank five proposed OWF sites off the coast of New Jersey To validate the proposed model a comparison against three alternative T2NN fuzzy based models is performed It is demonstrated that the implemented model yields the same ranking order Trends in Emerging Markets Finance, Institutions and Money Duc Khuong Nguyen, Stéphane Goutte, 2020-12-02 Since the waves of financial liberalization in the 1980s emerging market economies have been accessible to foreign investors Altogether they contributed up to 43.8% of the global GDP in 2018 and many of them such as China India Bangladesh Philippines Myanmar and Vietnam from 2010 to 2019 are among the fastest growing economies in the world Given the high economic growth the assets issued by companies in emerging markets are viewed as a new set of investment opportunities for global investors and fund managers who seek to improve the risk adjusted performance of their portfolios In addition to their risky profile due to the lack of transparency as well as stable and matured institutions their recent development path faces a number of challenges arising not only from the slow pace of economic reforms but also from their increased integration with the world Geopolitical risks the US China trade wars and rising policy uncertainty around the world are expected to reduce their growth potential and performance This Special Issue dedicates special attention to the current dynamics of emerging financial markets as well as their perspectives of development as a key driver for sustainable firms and economies Accordingly the focus is particularly placed on market integration and interdependence valuations and risk management practices and the financing means for inclusive growth
