Lesson Study with Mathematics and Science Preservice Teachers Sharon Dotger, Gabriel Matney, Jennifer Heckathorn, Kelly Chandler-Olcott, Miranda Fox, 2023-10-13 This insightful volume offers an overview of the fundamentals of lesson study student practice in US teacher education as well as examples from math and science teacher educators using lesson study in their local contexts. The number of teacher educators using lesson study with preservice teachers is small but growing. This book is aimed at teacher educators who may want to try lesson study in university contexts without the challenge of translating the practice from the K-12 context on their own. In this volume, lesson study is broadly overviewed. Attention is given to its constituent steps and examples of lesson study in preservice contexts are shared. Given the broad array of teacher education program designs, numerous contingencies guide teacher educators in their implementation of lesson study given their contextual affordances and limitations. The lesson study descriptions and cases in this book will support teacher educators and scholars across subject specialities and geographic lines as they seek instructional frameworks to advance their pedagogical goals.

[Science Strategies to Increase Student Learning and Motivation in Biology and Life Science Grades 7 Through 12](#) David Butler, 2022-02-17 On the first day of school have you ever thought of your classrooms as newly opened boxes of crayons? I do. Like pencil sticks of colored wax the students each have different names, individual characteristics, and various levels of brightness. I set a goal each year to promote not only creativity but to draw out of my students reasons about why science is so important. As science educators we not only need to illustrate the importance of knowing facts and terminology but also be able to frame those concepts in such a way that students are motivated to want to study and understand biology. When I began teaching I never thought that I would have the multitude of experiences I have now. I have taught in schools ranging from city to rural, public to private, and large to small, not to mention classes ranging from general science to advanced biology. Through these diverse experiences I have developed a number of strategies that have enhanced student achievement and science appreciation. In this book I will share with you these experiences and techniques showing you how to enhance teaching skills, increase student drive, create mental connections, better manage your class time, use proper technology, practice forms of differentiation, and incorporate the NGSS. In addition, this text allows me to share my most treasured philosophies, experiences, and teaching strategies and how they can be applied to biology/life science classrooms.
