Google Maps Best Store Hours:

Beginning Google Maps Applications with Rails and Ajax Andre Lewis, Cameron Turner, Jeffrey Sambells, Michael Purvis, 2007-05-02 The Google Maps API remains one of the showcase examples of the Web 2.0 development paradigm. *Beginning Google Maps Applications with Rails and Ajax: From Novice to Professional* is the first book to comprehensively introduce the service from a developer perspective showing you how you can integrate mapping features into your Rails driven web applications. Proceeding far beyond simplistic map display, you'll learn how to draw from a variety of data sources such as the U.S. Census Bureau's TIGER Line data and Google's own geocoding feature to build comprehensive geocoding services for mapping many locations around the world. The book also steers you through various examples that show how to encourage user interaction such as through pinpointing map locations, adding comments, and building community driven maps. You'll want to pick up a copy of this book because this is the first book to comprehensively introduce the Google Maps application development using the Rails development framework. You'll be introduced to the very latest changes to the Google Maps API embodied in the version 2 release. It is written by four developers actively involved in the creation of location based mapping services. For additional info, please visit the author's reference site for this book: *Don't Travel without iPhone*.
Beginning Google Maps Applications with PHP and Ajax Jeffrey Sambells, Michael Purvis, Cameron Turner, 2007-12-22 Until recently building interactive web based mapping applications has been a cumbersome affair. This changed when Google released its powerful Maps API. *Beginning Google Maps Applications with PHP and Ajax* was written to help you take advantage of this technology in your own endeavors, whether you're an enthusiast playing for fun or a professional building for profit. This book covers version 2 of the API including Google's new Geocoding service. Authors Jeffrey Sambells, Cameron Turner, and Michael Purvis get rolling with examples that require hardly any code at all, but you'll quickly become acquainted with many facets of the Maps API. They demonstrate powerful methods for simultaneously plotting large data sets, creating your own map overlays, and harvesting and geocoding sets of addresses. You'll see how to set up alternative tile sets and where to access imagery to use for them. The authors even show you how to build your own geocoder from scratch for those high volume batch jobs. As well as providing hands-on examples of real mapping projects, this book supplies a complete reference for the Maps API along with the relevant aspects of JavaScript, CSS, PHP, and SQL. Visit the authors' website for additional tips and advice.
Google Business Solutions All-in-One For Dummies Bud E. Smith, Ryan C. Williams, 2009-04-29 If you have a small business, you'll love the Google tools that are available at little or no cost. *Google Business Solutions All-in-One For Dummies* shows you how to use them all. Eight self-contained minibooks cover Google Apps, Google search tools for business, highlighting your business, creating a Web site with Google Sites, Google tools for your site, Google Ads and Analytics, securing business information, and getting noticed with Google Gadgets. As if that wasn't enough, there's a Google AdWords™ gift card worth \$25 inside the book, too. Get e-mail, calendar, online documents, and

records and more free in Google Apps Provide directions to your business reviews access to products and services and even coupons online with Google Maps and Google Base Use Google Docs Checkout and other tools to give your site all the e commerce features Track traffic and get advertisers with Google Ads and Analytics Choose tools to keep your e mail servers computers and files safe Create gadgets that promote your business and add value to your site Learn the secrets of search engine optimization the Google way You ll also find out how to use coupons effectively how to keep e mail and instant messaging safer and how to make the most of Google AdWords Google Business Solutions All in One For Dummies really DOES have it all
