Artificial Intelligence in Architecture and the Built Environment Michal Sourek, 2025-01-22 Imagine if every architect had an apprentice who could consistently observe and understand their intentions take over routine tasks and monitor technical environmental and economic constraints This apprentice would continually improve freeing the architect to concentrate on truly creative work This book outlines a plan to turn this vision into reality It evaluates the development of artificial intelligence from its inception to the present focusing on the last two decades of applying AI in architectural design and planning the current state of architectural practice is also examined Integrating architecture computer science AI robotics economics law neurobiology and philosophy the vision is built on three key premises i authentic poetic creativity that transcends parameterization and algorithmizing ii innovative learning strategies and training approaches not yet applied concerning architectural design and iii the convergence of architecture s inherent spatiality with virtual reality technology and new theories of human thinking and intelligence poised for implementation in machine learning

Digital in Underwater Cultural Heritage Guzden Varinlioglu, 2016-04-26 One can argue that academia has always existed in an information age however as the general public gains access to ever more advanced systems it can be claimed that areas of academia require updating to maintain vitality in today s world When nautical archaeology produces inspiring reports they are often at the hand of large budgets rather than general day to day dissemination This book proposes using state of the art low budget digital technology from the outset of surveys so that data may be recorded analysed and disseminated with seamless efficiency and great flair while employing progressively less decontextualized means Further it conveys a simple methodology that allows for data collection by teams of volunteer divers Big data rapid analysis and cross reference requirements have created a shift towards the need for advanced digital means

particularly relating to underwater archaeology where survey time is limited This book logs several years of studies which respect in situ preservation where the limits of technology were stretched to the cutting edge using novel collection methods to populate custom built numerical and visual databases generating 2D and 3D digital models and further creating a Virtual Reality museum These advances not only propel the function of academia but also promote the image of archaeology in an age where visualisation matters

Progress in Location Based Services 2018 Peter Kiefer,Haosheng Huang,Nico Van de Weghe,Martin Raubal,2017-12-07 This book gathers a selection of the best papers presented during the 14th International Conference on Location Based Services which was held in Zurich Switzerland between the 15th and 17th January 2018 It presents a general overview of recent research activities related to location based services Such activities have grown in importance over the past several years especially those concerning outdoor indoor positioning smart environments spatial modeling personalization and context awareness cartographic communication novel user interfaces crowdsourcing social media big data analysis usability and privacy
