## Science Comprehension Passage

### WiFi

WiFi is like the invisible strings that link your devices together in the present world. Every school, business, you have a WiFi tower that allows you to all your favorite websites. That's what WiFi does, but it's all done using special radio waves instead of wires.

So, as you WiFi is a wireless technology that allows devices like computers, tablets, and computers to connect to the internet and communicate with each other without using cables. It's like having a digital highway that allows data from your devices to connect and talk to each other.

One of the great things about WiFi is how convenient it is. Instead of being tied down by cables, you can move around freely while still staying connected to the internet. Whether you're streaming on the go, working from home, or keeping up with a video game, WiFi is your best connected companion.

Now here's WiFi's specialty: WiFi allows for special devices called routers, which can connect many more devices. When you connect to a WiFi network, your device sends requests to the router, which then forwards them to the internet and vice versa. It's like having a manager that routes your passenger train cars back because your drivers and the internet.

The biggest thing to know about WiFi is that it has a limited range. Typically, around 100 feet or less. That means that you'll probably be within range of the router to connect to the internet. But don't worry, if you move out of range, the connection automatically disconnects, or you'll have to move closer to your internet provider using an app on your phone.

WiFi technology has come a long way since it was first invented. WiFi routers have gotten smaller, faster, longer ranges, and better performance. Today, WiFi is found in a wide range of devices. From smartphones and laptops to smart home equipment and growing networks.

In conclusion, WiFi is a wireless technology that allows devices to connect to the internet and communicate with each other without using cables. It's fast, cheap, reliable, and essential for staying connected in the digital world.
