[Intended Consequences: How to Build Market-Leading Companies with Responsible Innovation](#) Hemant Taneja, Kevin Maney, 2022-01-25 WALL

STREET JOURNAL BESTSELLER A pioneering venture capitalist provides an actionable framework for founders and executives to create innovative enduring companies built for growth and for societal good The Milton Friedman philosophy that companies exist only to increase shareholder value is dead and buried The old Silicon Valley tenets of move fast and break things minimum viable products and hyper engagement at any cost must be replaced with new principles for an era of responsible innovation We can no longer manage businesses solely for growth With innovation comes responsibility to

generate returns beyond profits and to recenter technology as a force for good in the world. This requires a shift in the way organizations approach and value work. A company's mindset, its intent to do good, avoid harmful consequences and innovate responsibly is not enough. That mindset must be supported by a business model, a mechanism that leaders must intentionally and proactively build along with the company from the ground up, one that incentivizes and rewards the organization for fulfilling its intentions. Companies need a new set of KCIs or key consequence indicators that measure factors such as its impact on customers' energy consumption, whether its product is being used equally across socioeconomic groups or if it is actually solving the social problem it is addressing. Not only is this the right thing to do, increasingly it is what customers, employees and shareholders demand of business. In this inspiring, practical and actionable guide, Hemant Taneja lays out the argument for why a new model of company building and leadership is necessary and how it can lead to better performance. It explores why social good businesses are some of the greatest opportunities today, detailing examples of billion dollar startups that are addressing inequality, climate change, systemic societal problems and chronic disease, all while generating profit and positive shareholder returns. It presents a topic by topic road map that addresses business models, artificial intelligence, ethical growth, culture, governance and good citizenship. Intended Consequences is designed as the ultimate playbook for founders, entrepreneurs, leadership teams and investors on how to build and maintain a responsible innovation company.

Federer, 2020-09-15 From the former Head of Brand Strategy at Reddit comes a proven and thought provoking approach to the digital economy and how brands can create authentic engagement that is rooted in the fundamental motivations behind human psychology. Leading marketing practitioner and thought leader Joe Federer draws on evolutionary biology, anthropology, neuroanatomy, and psychology as well as more than a decade of hands on experience to explain why people act so differently in various online spaces and what they are seeking from participating in each one. Platforms like Reddit to the unfiltered Id, Facebook and Twitter to the managed Ego, and Instagram to the ideal Superego. In the same way you behave differently when you're home alone, out with friends, communicating with family, or interacting with coworkers, people act and express themselves differently in these various online spaces. Context matters. Understanding this will enable you to develop and execute effective engagement strategies to reach your target audiences on each social network.
