Beyond Intellect and Reasoning Acres A Stowe, 2022-03-31. The purpose of this book is to draw readers' attention to various legal intricacies associated with deploying self-directed artificial intelligence systems (AIS), particularly emphasizing the limits of the law vis-à-vis liability problems that may emerge within third-party contracts. With the advent of today's ostensible Amazon Halo or Alexa, consumers are having to conclude contracts, e.g., sale of goods and distant financial services, in much more complex cybernetic environments. Generally, with one party acting in the capacity of a human being while the other as an autonomous thing/device (AIS) with capabilities well beyond that of humans, representing the interests of others, not just other humans. Yet traditional jurisprudence is limited in scope for holding these systems legally accountable if they were to malfunction and cause harm. Interestingly, within the judicial system itself, the use of AIS is more prevalent now, including within the criminal justice system in some jurisdictions. In the United States, for instance, AIS algorithms are utilized to determine sentencing and bail processing. Still, jurists find themselves limited to traditional legal methodologies and tools when tackling novel situations brought about by these systems. For example, traditional strict liability concept as applied in tort law typically ties responsibility to the person, e.g., AIS developers influencing the decision-making process. In contract law, particularly where third parties are concerned, AIS are equated to tools for the purposes of traditional strict liability rules. Thus, binding anyone on whose behalf they would have acted, irrespective of whether such acts were intentional or foreseeable.

Exposure to Closure Stephen Sadler, 2011. Social media marketing pay per click. Twitter, Facebook, LinkedIn, search engine optimization: what does it all mean, and why should you even care? We all know that the economic meltdown of 2009 was tough for everyone. Even the seemingly invincible banking and insurance sector was almost brought to its knees. What was also interesting, and not so highly publicized, was how the recession also affected the marketing sector. Many large marketing firms, especially here in the Detroit Metropolitan area, are now gone. It's not very often you see large marketing firms just close up shop, especially when marketing is so important to gaining exposure for new products and services. Global competition is tough, so it is possible that companies can no longer afford expensive multi-million dollar marketing and ad campaigns. What about smaller companies: can they even afford to pop 10-25k on traditional marketing techniques every year? So, what if expensive old-school marketing is partly responsible for the continued recession due to our inability to cost-effectively compete? As with everything, problematic necessity is the mother of invention, and at the forefront of our recovery is Social Media Marketing. Living in Michigan for the last 15 years, I know many people that have been laid off and are starting new businesses. I wanted to help by giving new entrepreneurs a few tips and tools to help them succeed in today's rapidly changing hi-tech world. So, I wrote this book in story format for you to experience firsthand how my wife and I started a tech business and cost-effectively marketed a product even in the most trying of times. I hope you enjoy it.
