Interpreting Meat Teddy Duncan, Jr., 2024-12-27 Meat is the essential object dislodged in human animal relations in its commonplace everyday ubiquity and distanced violence it defies the innocuous or protective paternalistic stance that we ordinarily take towards animals Through looking at meat s status as a fundamental and visceral part of human animal relations particularly its commodification and consumption this book exhibits how animals fit into human discursive practices and how this discursive position determines our perspective of animals and subsequently our treatment of them Modernity is a distinct stage of meat production and accordingly the meat commodity must be examined in all its contemporary specificity as an economic linguistic philosophical psychoanalytic and material object Using theoretical

prisms that have been largely overlooked in animal studies such as Marxian analysis and Lacanian i ekian psychoanalysis and rejecting popular approaches such as analogical thinking and effacement of human animal difference this book offers new insights into the meat commodity and new ways to orient ourselves towards animal life and death     Handbook of Addictive Disorders Robert Holman Coombs,2004-04-28 The most comprehensive source for the latest research and practicetechniques for diagnosing and treating addictive disorders This book brings together an array of international experts onaddictive disorders Robert Coombs s Handbook of AddictiveDisorders discusses the contemporary issues surrounding theunderstanding of addiction from diagnosis to treatment of anaddicted client The Handbook of Addictive Disorders is anexample of practical and clinical information at its best Lorraine D Grymala Executive Director American Academy of HealthCare Providers in the Addictive Disorders The Handbook of Addictive Disorders A Practical Guide toDiagnosis and Treatment is a comprehensive state of the artresource featuring valuable contributions from a multidisciplinaryteam of leading experts This unique guide deftly defines addictionand examines its comorbidity with other problems Subsequentchapters present an overview of addictive disorders coupled withstrategies for accurately diagnosing them planning effectivetreatment and selecting appropriate interventions Chapters onpublic policy and prevention are of indispensable value in light ofthis growing health concern The only reference available to cover the full spectrum ofaddictions and addictive behaviors the Handbook of AddictiveDisorders provides the most current research and treatmentstrategies for overcoming Chemical dependency Workaholism Compulsive gambling Eating disorders Sex addiction Compulsive buying This useful guide features case studies figures and diagrams lists of practical interventions for each disorder andself assessment exercises for clients Psychologists addiction counselors social workers and othersworking in the addictions field will find the Handbook ofAddictive Disorders to be an essential resource for practical validated information on all types of addictions and their relatedproblems     **American Literature and Therapeutic Cultures** Martin Halliwell,Nicholas Manning,2026-01-31 This volume explores the myriad interactions between American literature and psychological discourses in the United States from self help to alternative health practices to psychotherapeutic approaches Spanning the 1940s to the 2020s it sheds light on the development and conceptualization of therapeutic culture during a century in which it has oscillated between clinical and cultural domains Bringing together an intergenerational group of scholars from France the UK and the US the collection examines authors as varied as William Carlos Williams Lionel Trilling Sylvia Plath Philip Roth Colson Whitehead Daniel Suarez and Ottessa Moshfegh Moving beyond the conventional focus on psychoanalysis the eleven contributors foreground how American literature is animated by broader therapeutic modes and trajectories At stake are not only literature s historical links to psychological theories and institutions but the neoliberal framing of literary texts as tools for personal restoration     Depth Public Relations Johanna Fawkes,2022-12-23 Contemporary global culture rooted in neoliberalism and free market forces increasingly emphasises appearance over

**Reinventing Richard Nixon** Daniel E. Frick, 2008 Examining Nixon's autobiographies and political memorabilia Frick offers far reaching perceptions not only of the man but of Nixon's version of himself contrasted with those who would interpret him differently He cites reinventions of Nixon from the late 1980s particularly the museum at the Richard Nixon Library and Birthplace to demonstrate the resilience of certain national mythic narratives in the face of liberal critiques And he recounts how celebrants at Nixon's state funeral at which Bob Dole's eulogy depicted a God fearing American hero attempted to bury the sources of our divisions over him rendering in some minds the judgment of redeemed statesman to erase his status as disgraced president With dozens of illustrations Nixon posing with Elvis the National Archives most requested photo Nixonian cultural artifacts classic editorial cartoons no other book collects in one place such varied images of Nixon from so many diverse media These reinforce Frick's probing analysis to help us understand why we disagree about Nixon and why it matters how we resolve our disagreements

Beth L. Bailey, 2004 The seventies witnessed economic decline in America coupled with a series of foreign policy failures events that created an air of unease and uncertainty This volume examines the ways in which Americans responded to a changing world and sought to redefine themselves *The Way We Never Were* Stephanie Coontz, 2016-03-29 The definitive edition of the classic myth shattering history of the American family Leave It to Beaver was not a documentary a man's home has never been his castle the male breadwinner marriage is the least traditional family in history and rape and sexual assault were far higher in the 1970s than they are today In *The Way We Never Were* acclaimed historian Stephanie Coontz examines two centuries of the American family sweeping away misconceptions about the past that cloud current debates about domestic life The 1950s do not present a workable model of how to conduct our personal lives today Coontz argues and neither does any other era from our cultural past This revised edition includes a new introduction and epilogue exploring how the clash between growing gender equality and rising economic inequality is reshaping family life marriage and male female relationships in our modern era More relevant than ever *The Way We Never Were* is a potent corrective to dangerous nostalgia for an American tradition that never really existed Major 20th-century Writers, 1991 **Reclaiming the**

**Culture** Alan R. Crippen, 1996 **Barry Commoner and the Science of Survival** Michael Egan, 2007 Chronicles the activist career of Barry Commoner one of the most influential American environmental thinkers and his role in recasting the environmental movement after World War II For over half a century the biologist Barry Commoner has been one of the most prominent and charismatic defenders of the American environment appearing on the cover of Time magazine in 1970 as the standard bearer of the emerging science of survival In *Barry Commoner and the Science of Survival* Michael Egan examines

Commoner's social and scientific activism and charts an important shift in American environmental values since World War II. Throughout his career Commoner believed that scientists had a social responsibility and that one of their most important obligations was to provide citizens with accessible scientific information so they could be included in public debates that concerned them. Egan shows how Commoner moved naturally from calling attention to the hazards of nuclear fallout to raising public awareness of the environmental dangers posed by the petrochemical industry. He argues that Commoner's belief in the importance of dissent, the dissemination of scientific information and the need for citizen empowerment were critical planks in the remaking of American environmentalism. Commoner's activist career can be defined as an attempt to weave together a larger vision of social justice. Since the 1960s he has called attention to parallels between the environmental civil rights, labor and peace movements and connected environmental decline with poverty, injustice, exploitation and war, arguing that the root cause of environmental problems was the American economic system and its manifestations. He was instrumental in pointing out that there was a direct association between socioeconomic standing and exposure to environmental pollutants and that economics, not social responsibility, was guiding technological decision making. Egan argues that careful study of Commoner's career could help reinvigorate the contemporary environmental movement at a point when the environmental stakes have never been so high.

#### **American Experimental Poetry and Democratic**

**Thought** Alan Marshall, 2009. Alan Marshall takes Alexis de Tocqueville's discussion of Some Sources of Poetic Inspiration in *Democracy in America* as the starting point for a wide-ranging examination of the nature of democratic thought and expression in American experimental poetry from Walt Whitman and Emily Dickinson in the mid-nineteenth century to George Oppen, Frank O'Hara and Robert Creeley a century later. The book begins by considering the political significance of what Marshall describes as the invisible physiognomy of Whitman's poetry, which is followed by a re-evaluation of the flawed republican humanism of Ezra Pound in the light of the thought of Hannah Arendt. Other chapters deal with Mina Loy, Lorine Niedecker, Wallace Stevens, William Carlos Williams and Muriel Rukeyser. The book argues against the narrowly ideological interpretation of politics that dominates contemporary literary studies. To that extent it recalls Tocqueville's concern to underline the differences between his own methods and perspectives and the historical determinism of his contemporaries. Marshall brings together an exceptional variety of theoretical writing, including works by Theodor Adorno, Seyla Benhabib, Stanley Cavell, Sigmund Freud, Martin Heidegger, Immanuel Kant, James Madison, Karl Marx, David Riesman and Donald Winnicott, as he seeks to expand and develop Tocqueville's circumspect humanist critical trajectory. The chapters are conceived as a series of innovative dialogical constellations to which the close reading of poetry is central. The aim throughout is to measure the thought of the poets or their poems against the thoughts of those who are more often called thinkers. *Telos*, 1983.
