## **The Cybernetic Theory Of Decision New Dimensions Of Political Analysis:**

**The Cybernetic Theory of Decision** John D. Steinbruner, 2002-08-25 In this classic work John Steinbruner argues that the time is ripe for exploration of a new theoretical perspective on the decision making process in government. He suggests that the cybernetic theory of decision as developed in such diverse fields as information theory, mathematical logic and behavioral psychology generates a systematic but non-rational analysis that seems to explain quite naturally decisions that are puzzling when viewed from the rational perspective. When combined with the basic understanding of human mental operations developed in cognitive psychology, the cybernetic theory of decision presents a striking picture of how decision makers deal with the intense uncertainty and fundamental value conflicts that arise in bureaucratic politics. To illustrate the advantages of using cybernetic theory, Steinbruner analyzes the issue of sharing nuclear weapons among the NATO allies.

**The Cybernetic Theory of Decision**, 2002    [Michigan Journal of Political Science](#), 1981    **Theory and Methods in Comparative Policy Analysis Studies** Iris Geva-May, B. Guy Peters, Joselyn Muhleisen, 2020-06-09 Volume One of the Classics of Comparative Policy Analysis Theory and Methods in Comparative Policy Analysis Studies includes chapters that apply or further theory and methodology in the comparative study of public policy in general and policy analysis in particular. Throughout the volume, the chapters engage in theory building by assessing the relevance of theoretical approaches drawn from the social sciences as well as some which are distinctive to policy analysis. Other chapters focus on various comparative approaches based on developments and challenges in the methodology of policy analysis. Together, this collection provides a comprehensive scholastic foundation to comparative policy analysis and comparative policy studies. Theory and Methods in Comparative Policy Analysis Studies will be of great interest to scholars and learners of public policy and social sciences as well as to practitioners considering what can be learned or facilitated through methodologically and theoretically sound approaches. The chapters were originally published as articles in the Journal of Comparative Policy Analysis, which in the last two decades has pioneered the development of comparative public policy. The volume is part of a four volume series, the Classics of Comparative Policy Analysis, including Theories and Methods, Institutions and Governance, Regional Comparisons and Policy Sectors. Each volume showcases a different new chapter comparing domains of study interrelated with comparative public policy, political science, public administration, governance and policy design, authored by the JCPA co-editors, Giliberto Capano, Iris Geva May, Michael Howlett, Leslie A. Pal and B. Guy Peters.    *Human-Centric Decision-Making Models for Social Sciences* Peijun Guo, Witold Pedrycz, 2013-11-01 The volume delivers a wealth of effective methods to deal with various types of uncertainty inherently existing in human centric decision problems. It elaborates on comprehensive decision frameworks to handle different decision scenarios which help use effectively the explicit and tacit knowledge and intuition model perceptions and preferences in a more human oriented style. The book presents original approaches and delivers new results on fundamentals and applications related to human centered decision making approaches to business.

This study examines the nature of decision making within the Mexican political system in the area of industrial policy The combination of interests that generated this work is a complex one which evolved over the course of my graduate work I attribute the key spark to an interest in multinationals and the response they have evoked from host governments in Latin America My inquiry into views these governments have developed towards foreign investment led to a recognition of the increasingly important role technocrats exercise in formulating industrial policy Of particular interest was the case of Mexico where technocrats have inherited the highest political office in the last three administrations and are now poised to continue that trend Mexico also merited interest because of the on going debate about the nature of its political system authoritarian or democratizing At the center of such a question lies the age old concern over the locus of power and the relatively more recent interest in determining the distribution of influence Theses sdw
