Towards a Critique of Architecture's Contemporaneity Gevork Hartoonian, 2023-02-14 Pursuing historical analogies between nineteenth century theories and the current practices captivated by digital reproducibility this book offers a critical take on architecture's contemporaneity through four essays tectonics materiality cladding and labor Fundamental to this proposition is the historicity of Gottfried Semper's theorization of architecture amidst the outpouring of new materials and construction techniques during the 1850s Starting with Semper's differentiation between theatricalization and the tectonic of theatricality this book examines thematic essential to architecture's self representation Even though the title of this book recalls the Semperian Four Elements of Architecture its argument encapsulates a unique historicoc theoretical project probing the tectonic of theatricality beyond Semper The invisible tie between technique and labor is the cord running through the four subjects covered in this book In exploring these subjects from the theoretical standpoint of Marxian dialectics this book's contribution is focused on but not limited to the topicality of labor today when its relationship with capital has been further obscured by the prevailing digitalization of commodity exchange value starting roughly in the 1990s Each essay examines Semper's theorization of architecture in contradistinction to the ways in which technology's mediation has dominated architecture's representation Burrowing through the invisible tie between technique and work asymptomatic of architecture's predicament in global capitalism Towards a Critique of Architecture's Contemporaneity advances the scope of architectural criticism beyond the exhausted formalism and architecture's turn to philosophy circa the 1980s and the present tendencies for presentism It will therefore be of interest to researchers and students of architectural history and theory

Gender Studies in Architecture Dörte Kuhlmann, 2014-04-11 Analyzing a range of ideas from biological evolutionary and anthropological theories to a variety of feminist psychoanalytic poststructuralist and constructivist discourses this book provides a comprehensive introduction to the problematics of gender and power in architectural and urban design Topics range from conceptions of postulated matriarchal architecture in Old Europe to contemporary technologies of control from the mechanisms of gaze to architectural performatives from the under representation of women in the planning profession to the integration of gender issues to the curriculum The particular strengths of the book lie in its inclusiveness and critical analysis It is not a partisan defence of feminism or any other theory but a critical introduction to the issues relating to gender Moreover the conclusions reach beyond a narrow gender studies perspective to social and ethical considerations that are unavoidable in any responsible architectural or urbanistic practice With its broad range and

balanced analysis of different theories the book is suitable as an overview of gender studies in architecture and useful for any designer who is concerned with the social effects of the built environment *Sebastiano Serlio on Architecture: Books VI-VII of 'Tutte l'opere d'architettura et prospetiva' with 'Castrametation of the Romans' and 'The Extraordinary book of doors'* Sebastiano Serlio, 1996-01-01 Sebastiano Serlio was the most important architectural writer and theorist of the sixteenth century. The author of the first wide ranging illustrated book on architecture he produced a complete set of model designs as well as practical solutions for everyday design problems. This volume the second in a two volume series of Serlio's entire works presents the previously unpublished sixth book the seventh book and as well as The Extraordinary Book of Doors his little known Castrametation of the Romans each of which demonstrates Serlio's sophisticated design theories. This is the first translation of Serlio's later works and the first time that the long lost sixth volume has been united with its companion works and restored to its intended position. The book also includes an introduction and notes by translators Vaughan Hart and Peter Hicks that demonstrate Serlio's significance within the history of architecture and the importance of these neglected texts to our understanding of Serlio's work *Building Theories* Franca Trubiano, 2022-11-25 *Building Theories* speaks to the value of words in architecture. It addresses the author's fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text. It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building. In this *Building Theories* argues for the return of a practice of architectural theory that is set amongst building buildings and builders. This journey of close reading reinterprets the words of Vitruvius Alberti de L'Orme Le Camus de Mézières Boullée Laugier Rondelet Semper Viollet le Duc Hirsch Bötticher Berlage Muthesius Wagner Behrendt Gropius and Arup. With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas. *Building Theories* considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns. In response it argues for a realignment of architecture with the concept of *techn* with a dual commitment to *fabrica* and *ratio* with a productive return to *l'art de bien bastir* with the accurate translation of the term *Baukunst* and with an appeal to the architect's composite mind. Students practitioners and educators will identify in *Building Theories* ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics and accept without reservation that material transformations have always been at the origins of built form *Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl.* Avery Library, 1997 *The Monumental Impulse* George L. Cultural Mediators Annette de Vries,2008 The notion of cultural mediation is a promising albeit not yet methodologically clear cut and well probed instrument for studying artistic and literary phenomena in the Late Medieval and Early Modern Period This volume addresses the role of artists and writers as cultural mediators in a variety of cultural fields such as religion politics morality and artistic expression art literature and theatre It fully acknowledges the diversity of roles that the term cultural mediator incorporates The artist or writer may be a neutral transmitter a dedicated instructor a conscious advocate an unconscious exponent or an autonomous inventor of whatever message is being transmitted by way of visual or verbal artefacts In reality these roles were often intertwined but distinguishing them enables us to recognise the main variables that shaped the role of a cultural mediator the intentionality of the artist or writer the function of his or her work and its reception by the viewers or audience The essays collected in this volume offer a stimulating interdisciplinary exploration of the range variety and impact of the artist or writer as a cultural mediator while avoiding a deadlock between notions of art and literature as subsidiary versus self contained fields of creative expression *What Art is* Louis Torres,Michelle Marder Kamhi,2000 The co editors of the scholarly but gutsy little periodical Aristos present and support the less well known position of philosopher novelist Rand 1905 82 in debunking what passes for modern postmodern art Appends a list of alleged new forms of art and artworld buzz words A third of the book consists of notes and references Annotation copyrighted by Book News Inc Portland OR *The Etruscan Language* Giuliano Bonfante,Larissa Bonfante,2002 A revised updated and expanded edition of the first concise introduction to the study of the Etruscan language in English The standard historical reference and a popular textbook for students of languages linguistics ancient civilization and Etruscan studies Provides the best collection of Etruscan inscriptions and texts currently in print A substantial archeological introduction sets
