THE DEATHS OF OTHERS

THE FATE OF CIVILIANS IN AMERICA'S WARS

An aerial photograph of a rural landscape. In the foreground, there are fields with various crops, some roads, and a small bridge. In the middle ground, there is a large, brown, irregularly shaped area that appears to be a cleared field or a site of destruction. The background shows rolling hills and mountains under a clear sky.

The Deaths Of Others The Fate Of Civilians In Americas Wars:

The Deaths of Others John Tirman, 2011-07-01 Americans are greatly concerned about the number of our troops killed in battle 33 000 in the Korean War 58 000 in Vietnam 4 500 in Iraq and rightly so But why are we so indifferent often oblivious to the far greater number of casualties suffered by those we fight and those we fight for This is the compelling largely unasked question John Tirman answers in The Deaths of Others Between six and seven million people died in Korea Vietnam and Iraq alone the majority of them civilians And yet Americans devote little attention to these deaths Other countries however do pay attention and Tirman argues that if we want to understand why there is so much anti Americanism around the world the first place to look is how we conduct war We understandably strive to protect our own troops but our rules of engagement with the enemy are another matter From atomic weapons and carpet bombing in World War II to napalm and daisy cutters in Vietnam and beyond our weapons have killed large numbers of civilians and enemy soldiers Americans however are mostly ignorant of these methods believing that American wars are essentially just necessary and good Trenchant and passionate The Deaths of Others forces readers to consider the tragic consequences of American military action not just for Americans but especially for those we fight against

The Deaths of Others John Tirman, 2011 Americans are greatly concerned about the number of American troops killed in battle and rightly so However this book questions why Americans are so indifferent often oblivious to the far greater number of casualties suffered by those they fight and those they fight for

Navigating War, Dissent and Empathy in Arab/U.S Relations Osman Latiff, 2021-06-28 This book focuses on American political discourse connected to war dissent and empathy Through interdisciplinary methods of history politics and media studies the book examines ways in which American self identity alters as a consequence of media portrayal of human suffering and of its existential others It compares representations of the Iraq wars to earlier precedents and looks at the work of American activists assessing how narratives and images of human suffering in new media iconography generate empathic attitudes towards others This comparative multimodal study helps to explain shifting self identities within the U S and relationally through the representation of the Arab other presenting an original and historicised contribution to the media war field of academic and public debate The book underscores empathy as a vibrant category of analysis that expands how we think about West Arab relations revealing how understanding the cultural aspects of this conflictual interrelationship needs to be broadened

Enemy Civilian Casualties Ofer Fridman, 2019-03-13 Civil casualties and collateral damage have been long considered as an undesired outcome of military activity that has to be reduced While most of the contemporary discourse on this topic has been primarily concentrating on three main factors the legal aspects of causing civil casualties the impact of war on local population and different factors of military professionalism required to avoid disproportional harm to civilians this book asks an entirely different question As the subject of civil casualties during military operations seems to be highly politicized this book takes this discourse out of its usual niches and suggests that the indirect responsibility rests with

the politicians and the public which they represent When a society in the beginning of the 21st century sends its troops to a battle does it really care about the enemy civilian casualties To answer this question this book traces the political and cultural factors that have led to the failure of Non Lethal Weapons the great promise of the 1990s which was intended to make the war significantly less lethal than it was known before Examining three different cases this study explains that the idea of minimizing civil casualties is no more than an illusion and in fact neither politicians nor societies feel really stressed to change this situation

Memory, Reconciliation, and Reunions in South Korea Nan Kim, 2016-10-31 Winner of the 2019 Scott Bills Memorial Prize for Outstanding First Book in Peace History *Memory Reconciliation and Reunions in South Korea Crossing the Divide* explores the history and tells the story of the emotionally charged meetings that took place among family members who after having lost all contact for over fifty years on opposite sides of the Korean divide were temporarily reunited in a series of events beginning in 2000 During an unprecedented period of reconciliation between North and South Korea those nationally televised reunions would prove to be the largest meetings held theretofore among civilians from the two states since the inter Korean border was sealed following the end of active hostilities in 1953 Drawing on field research during the reunions as they happened oral histories with family members who participated interviews among government officials involved in the events negotiation and planning and observations of breakthrough developments at the turn of the millennium this book narrates a grounded history of these pivotal events The book further explores the implications of such intimate family encounters for the larger political and cultural processes of moving from a disposition of enmity to one of recognition and engagement through attempts at achieving sustained reconciliation amid the complex legacies of civil war and the global Cold War on the Korean Peninsula

The Great Delusion John J. Mearsheimer, 2018-01-01 A major theoretical statement by a distinguished political scholar explains why a policy of liberal hegemony is doomed to fail It is widely believed in the West that the United States should spread liberal democracy across the world foster an open international economy and build international institutions The policy of remaking the world in America's image is supposed to protect human rights promote peace and make the world safe for democracy But this is not what has happened Instead the United States has become a highly militarized state fighting wars that undermine peace harm human rights and threaten liberal values at home In this major statement the renowned international relations scholar John Mearsheimer argues that liberal hegemony the foreign policy pursued by the United States since the Cold War ended is doomed to fail It makes far more sense he maintains for Washington to adopt a more restrained foreign policy based on a sound understanding of how nationalism and realism constrain great powers abroad *The Great Delusion* is a lucid and compelling work of the first importance for scholars policymakers and everyone interested in the future of American foreign policy

East Asia's Other Miracle Alex J. Bellamy, 2017 Mass atrocities were once a common occurrence in East Asia Yet over the past three decades mass atrocities have declined in East Asia to the point of near elimination This book explains how and why
