Process-Driven Applications with BPMN Volker Stiehl,2014-09-17 How can we optimize differentiating business processes and exploit their full potential Here Volker Stiehl provides answers utilizing the various options that the BPMN Business Process Model and Notation standard offers for planning implementing and monitoring processes The book presents an approach for implementing an architecture for applications that strives to find a balance between development and maintenance costs sustainability scalability and fault tolerance that meets flexibility requirements without becoming inordinately complex itself and that keeps the end application as abstract as possible from the system landscape in which it operates Based on the semantic enhancements found in version 2 0 of the BPMN standard which have made it possible to execute process models his approach exploits BPMN to create and run complete application architectures In this context BPMN is not just used to model the business processes of the application as the B in BPMN might suggest but also to model and execute the integration processes between the systems Throughout the book the software package SAP Process

Orchestration is used to illustrate the implementation of the proposed architecture yet all recommendations are intentionally kept generic so that they can be implemented on any other comparable platform as well Software architects IT managers software developers and project managers as well as students of information and business technology will find the book a valuable resource The proposed application architecture offers them a detailed blueprint the principles of which they can use to plan and implement process driven distributed applications **Inverting the Paradox of Excellence** Vivek Kale,2014-07-14 Over time overemphasis and adherence to the same proven routines that helped your organization achieve success can also lead to its decline resulting from organizational inertia complacency and inflexibility Drawing lessons from one of the best models of success the evolutionary model Inverting the Paradox of Excellence explains why your organization must proactively seek out changes or variations on a continuous basis for ensuring excellence by testing out a continuum of opportunities and advantages In other words to maintain excellence the company must be in a constant state of flux The book introduces the patterns and anti patterns of excellence and includes detailed case studies based on different dimensions of variations including shared values variations structure variations and staff variations It presents these case studies through the prism of the variations idea to help you visualize the difference of the case history approach presented here The case studies illustrate the different dimensions of business variations available to help your organization in its quest towards achieving and sustaining excellence The book extends a set of variations inspired by the pioneering McKinsey 7S model namely shared values strategy structure stuff style staff skills systems and sequence It includes case history segments for Toyota Acer eBay ABB Cisco Blackberry Tata Samsung Volvo Charles Schwab McDonald s Scania Starbucks Google Disney and NUMMI It also includes detailed case histories of GE IBM and UPS **Deutsche Nationalbibliographie und Bibliographie der im Ausland erschienenen deutschsprachigen Veröffentlichungen** ,2008 **Re-conceptualizing Enterprise Information Systems** Charles Moller,Sohail Chaudhry,2012-04-05 This book constitutes the post conference proceedings of the 5th International IFIP Working Conference on Research and Practical Issues of Enterprise Information Systems CONFENIS 2011 held in Aalborg Denmark October 16 18 2011 The 12 papers presented in this volume were carefully reviewed and selected from 103 submissions The papers are organized in four sections on conceptualizing enterprise information systems emerging topics in enterprise information systems enterprise information systems as a service and new perspectives on enterprise information systems These papers are complemented by two keynotes and a short summary of the co located Workshop on Future Enterprise Information Systems using Lego Serious Games
