Communication Arts, 2009 **The Economist**, 2007 **Cloudmoney** Brett Scott, 2022-07-05. Axiom Award Gold Medalist for Business Commentary. The reach of Corporations into our lives via cards and apps has never been greater. Many of us rarely use cash these days. But what we're told is a natural and inevitable move is actually the work of powerful interests. And the great battle of our time is the battle for ownership of the digital footprints that make up our lives. In **Cloudmoney**, Brett Scott tells an urgent and revelatory story about how the fusion of Big Finance and Big Tech requires cloudmoney digital money underpinned by the banking sector to replace physical cash. He dives beneath the surface of the global financial system to uncover a long established lobbying infrastructure, an alliance of partners waging a covert war on cash. He explains the technical, political, and cultural differences between our various forms of money and shows how the cash system has been under attack for decades as banking and tech companies promote a cashless society under the banner of progress. **Cloudmoney** takes us to the front lines of a war for our wallets that is also about our freedom from marketing strategies against cash, to the weaponization of COVID 19 to push fintech platforms, and from there to the rise of the cryptocurrency rebels and fringe groups pushing back. It asks the most pressing questions: Who benefits from a cashless society and who gets left behind? Is the end of cash the end of true privacy? And is our cloudmoney future closer than we think it is? **Cartographic Perspectives**, 2011 **Never Lost Again** Bill Kilday, 2018-05-29. As enlightening as *The Facebook Effect*. Elon Musk and Chaos Monkeys: the compelling behind the scenes story of the creation of one of the most essential applications ever devised and the rag tag team that built it and changed how we navigate the world. **Never Lost Again** chronicles the evolution of mapping technology, the overnight success, twenty years in the making. Bill Kilday takes us behind the scenes of the tech's development and introduces to the team that gave us not only Google Maps but Google Earth and most recently Pokémon GO. He takes us back to the beginning to Keyhole, a cash-strapped startup mapping company started by a small town Texas boy named John Hanke that nearly folded when the tech bubble burst. While a contract with the CIA kept them afloat, the company's big break came with the first invasion of Iraq. CNN used their technology to cover the war and made it famous. Then Google came on the scene, buying the company and relaunching the software as Google Maps, and

Google Earth Eventually Hanke's original company was spun back out of Google and is now responsible for Pok mon GO and the upcoming Harry Potter Wizards Unite Kilday the marketing director for Keyhole and Google Maps was there from the earliest days and offers a personal look behind the scenes at the tech and the minds developing it But this book isn't only a look back at the past it is also a glimpse of what's to come Kilday reveals how emerging map based technologies including virtual reality and driverless cars are going to upend our lives once again Never Lost Again shows us how our worldview changed dramatically as a result of vision imagination and implementation It's a crazy story And it all started with a really good map
