Machine-to-Machine Marketing (M2M) via Anonymous Advertising Apps Anywhere Anytime (A5) Jesus Mena, 2016-04-19 In today's wireless environment, marketing is more frequently occurring at the server-to-device level, with that device being anything from a laptop or phone to a TV or car. In this real-time digital marketplace, human attributes such as income, marital status, and age are not the most reliable attributes for modeling consumer behaviors. A more effective approach is to use machine-to-machine marketing (M2M) via anonymous advertising apps, which can target specific devices based on their unique identifiers. This allows marketers to deliver personalized ads to individual users without invading their privacy. The book covers the basics of M2M marketing, including how it works, its benefits, and how it can be used to improve marketing campaigns. It also provides practical advice on how to implement M2M marketing in a business setting, including tips on selecting the right platform, creating effective ads, and measuring success.
