The Artificial Intelligence Imperative Anastassia Lauterbach, Andrea Bonime-Blanc, 2018-04-12 This practical guide to artificial intelligence and its impact on industry dispels common myths and calls for cross sector collaborative leadership for the responsible design and embedding of AI in the daily work of businesses and oversight by boards Artificial intelligence has arrived and it's coming to a business near you The disruptive impact of AI on the global economy from health care to energy financial services to agriculture and defense to media is enormous Technology literacy is a must for traditional businesses their boards policy makers and governance professionals This is the first book to explain where AI comes from why it has emerged as one of the most powerful forces in mergers and acquisitions and research and development and what companies need to do to implement it successfully It equips business leaders with a practical roadmap for competing and even thriving in the face of the coming AI revolution The authors analyze competitive trends provide industry and governance examples and explain interactions between AI and other digital technologies such as blockchain cybersecurity and the Internet of Things At the same time AI experts will learn how their research and products can increase the competitiveness of their businesses and corporate boards will come away with a thorough knowledge of the AI governance ethics and risk questions to ask

Learning OpenCV 3 Adrian Kaehler, Gary Bradski, 2016-12-14 Get started in the rapidly expanding field of computer vision with this practical guide Written by Adrian Kaehler and Gary Bradski creator of the open source OpenCV library this book provides a thorough introduction for developers academics roboticists and hobbyists You'll learn what it takes to build applications that enable computers to see and make decisions based on that data With over 500 functions that span many areas in vision OpenCV is used for commercial applications such as security medical imaging pattern and face recognition robotics and factory product inspection This book gives you a firm grounding in computer vision and OpenCV for building simple or sophisticated vision applications Hands on exercises in each chapter help you apply what you've learned This volume covers the entire library in its modern C implementation including machine learning tools for computer vision Learn OpenCV data types array types and array operations Capture and store still and video images with HighGUI Transform images to stretch shrink warp remap and repair Explore pattern recognition including face detection Track objects and motion through the visual field Reconstruct 3D images from stereo vision Discover basic and advanced machine learning techniques in OpenCV

Writing Scientific Research Articles Margaret Cargill, Patrick D. T. O'Connor, 2013-06-04 This book shows scientists how to apply their analysis and synthesis skills to overcoming the challenge of how to write as well as what to write to maximise their chances of publishing in international scientific journals The book uses analysis of the scientific article genre to provide clear processes for writing each section of a manuscript starting with clear story construction and packaging of results Each learning step uses practical exercises to develop writing and data presentation skills based on reader analysis of well written example papers Strategies are presented for responding to referee comments and for

developing discipline specific English language skills for manuscript writing and polishing The book is designed for scientists who use English as a first or an additional language and for individual scientists or mentors or a class setting In response to reader requests the new edition includes review articles and the full range of research article formats as well as applying the book s principles to writing funding applications Web support for this book is available at www.writersresearch.com.au

GameAxis Unwired ,2008-09 GameAxis Unwired is a magazine dedicated to bring you the latest news previews reviews and events around the world and close to you Every month rain or shine our team of dedicated editors and hardcore gamers put themselves in the line of fire to bring you news previews and other things you will want to know **Real-time Image Processing ...** ,2006 **The New York Times Index** ,2008 *Linux Journal* ,2004-07 *Beginning Google Maps Applications with Rails and Ajax* Andre Lewis,Cameron Turner,Jeffrey Sambells,Michael Purvis,2007-05-02 The Google Maps API remains one of the showcase examples of the Web 2 0 development paradigm *Beginning Google Maps Applications with Rails and Ajax From Novice to Professional* is the first book to comprehensively introduce the service from a developer perspective showing you how you can integrate mapping features into your Rails driven web applications Proceeding far beyond simplistic map display youll learn how to draw from a variety of data sources such as the U S Census Bureau s TIGER Line data and Google s own geocoding feature to build comprehensive geocoding services for mapping many locations around the world The book also steers you through various examples that show how to encourage user interaction such as through pinpointing map locations adding comments and building community driven maps Youll want to pick up a copy of this book because This is the first book to comprehensively introduce the Google Maps application development using the Rails development framework Youll be introduced to the very latest changes to the Google Maps API embodied in the version 2 release It is written by four developers actively involved in the creation of location based mapping services For additional info please visit the author s reference site for this book **Google Maps Hacks** Rich Gibson,Schuyler Erle,2006-01-17 Foreword by Jens Lars Rasmussen Google Maps Tech Leads [Never Lost Again](#) Bill Kilday,2018-05-29 As enlightening as *The Facebook Effect* Elon Musk and Chaos Monkeys the compelling behind the scenes story of the creation of one of the most essential applications ever devised and the rag tag team that built it and changed how we navigate the world *Never Lost Again* chronicles the evolution of mapping technology the overnight success twenty years in the making Bill Kilday takes us behind the scenes of the tech s development and introduces to the team that gave us not only Google Maps but Google Earth and most recently Pok mon GO He takes us back to the beginning to Keyhole a cash strapped startup mapping company started by a small town Texas boy named John Hanke that nearly folded when the tech bubble burst While a contract with the CIA kept them afloat the company s big break came with the first invasion of Iraq CNN used their technology to cover the war and made it famous Then Google came on the scene buying the company and relaunching the software as Google Maps and Google Earth Eventually Hanke s original company was spun back out of Google and is now responsible for Pok mon GO

and the upcoming Harry Potter Wizards Unite Kilday the marketing director for Keyhole and Google Maps was there from the earliest days and offers a personal look behind the scenes at the tech and the minds developing it But this book isn't only a look back at the past it is also a glimpse of what's to come Kilday reveals how emerging map based technologies including virtual reality and driverless cars are going to upend our lives once again Never Lost Again shows us how our worldview changed dramatically as a result of vision imagination and implementation It's a crazy story And it all started with a really good map
