***The Bottom Line*** Advisory Committee on Student Financial Assistance, 2011 In making decisions about college it is essential that students and parents focus on net price which is the dollar amount that must be paid after subtracting financial assistance from cost of attendance A net price

calculator is one of two financial aid tools designed to provide students and parents with accurate and timely information about the net price of a particular college or type of college. A well designed calculator can provide an early estimate of cost of attendance and financial aid long before application for admission. A second tool, a financial aid award letter, provides a list of the financial aid an admitted student will likely receive once enrolled. While used at different points in the decision making process, these tools are often closely related from a student and parent perspective. The closer a net price calculator approximates the dollar amounts that are likely to appear in the financial aid award letter issued once the student has been admitted, the more useful it is in the decision making process.

In the Higher Education Opportunity Act of 2008, Congress included two new requirements aimed at ensuring students and parents are provided with the data they need to make sound decisions. To ensure broad availability of net price calculators, Congress directed the Department of Education to develop a template as guidance and required each institution to make its own version available on its website by fall 2011. To encourage greater standardization of financial aid award letters, Congress also directed the Department to develop a model financial aid award letter as guidance for institutions.

On March 17, 2011, the Advisory Committee held its spring hearing in Washington, DC, and devoted two panels to a discussion of issues associated with net price calculators and financial aid award letters. The first panel included researchers and analysts; the second panel included practitioners. After providing background, this report presents a transcript of those two panels, highlighting notable passages. Overall, the following consensus emerged from the panel discussions:

1. Students and parents need accurate and timely information about both college expenses and financial aid from middle school through college enrollment and persistence.
2. The current status of financial aid award letters, in particular the lack of comparability from institution to institution, provides a cautionary tale for the future of net price calculators.
3. While net price calculators have the potential to be useful tools for students and parents, they are likely to suffer from several limitations that warrant further examination.

**The Price of Admission** Thomas J. Kane, 2010-12-01 Over the past fifteen years a college education has become increasingly valuable in the labor market As a result the stakes have been raised in the debate over college admissions and student financial aid With the gap in college enrollment widening by family income the time has come to examine the strengths and weaknesses of the American system for financing higher education and to rethink its structure from the ground up This book begins with an overview of the many indirect ways in which Americans pay for college as taxpayers students and parents and describes the sometimes perverse ways in which state and federal financial aid policies interact Thomas J Kane evaluates alternative explanations for the rise in public and private college costs weighing the role of federal financial aid policy higher input costs and competitive pressures on individual colleges He analyzes how far we have come in ensuring access to all Evidence suggests that large differences in college enrollment remain between high and low income students even those with similar test scores and attending the same high schools Kane promotes a package of reforms intended to squeeze more social bang from the many public bucks devoted to higher education For example he advocates front loading the Pell grant program limiting eligibility to those in their first two years of college and providing a larger share of federal subsidies by assessing student resources after college rather than evaluating a single year of parents
