Utilization of Residual Forest Biomass Pentti Hakkila, 2012-12-06 An increase in the demand for wood results in improved recovery and less residual biomass in the forests Paradoxically interest in forest residue as a renewable source of raw material seems to be in a reverse ratio to its availability in a certain area Finland and Sweden are probably more dependent on forestry and forest industries than any other developed countries in the world A sufficiency of raw material for integrated forest industries is vital for the national economy of both countries and a great deal of attention is being paid to the long term potential of unutilized biomass left behind in logging operations Furthermore since these countries possess no reserves of fossil fuels and since their per capita consumption of primary energy is exceptionally high they also consider unmerchantable forest biomass a realistic source of indigenous energy A joint Nordic research project on harvesting and utilization of logging residue was carried out in 1969 1976 under the auspices of the Nordic Research Council on Forest Operations This fruitful cooperation soon gave rise to related national projects in Sweden Finland Norway and Denmark stimulating further research and producing practical applications Concurrently particularly after the worldwide energy crisis in 1973 research on all aspects of utilization of forest biomass mushroomed in the United States Canada and the Soviet Union An explosive increase occurred in both the number and diversity of biomass studies *USDA Forest Service General Technical Report INT.* ,1982 **New Perspectives on Swedish Economic History** Susanna Fellman, Jan Ottosson, 2024-12-11 This book takes as its point of departure the strong Swedish economic historical scholarly tradition that has combined rigorous macroeconomic analysis with a classical institutional approach when investigating Swedish economic development One important scholar in this tradition is Professor Lena Andersson Skog who has in her scholarly work focused on among other things the role of infrastructure regulation entrepreneurship and female labour To honour Andersson Skog's path breaking work this book consists of chapters written by her colleagues and former students in which they combine this tradition with new research into the themes of the role of infrastructure institutional framework and regulation entrepreneurship and female labour This is not an ordinary Festschrift but rather a collection of essays of recent important research into Swedish economic history with new data and insights General Technical Report INT. ,1980 Timber
