Profile:			

Description

L50C is a four-wheel drive loader with articulated frame steering.

The engine is a four-cylinder, four-stroke, direct-injection, turbocharged diesel engine with the type designations TD 40 GA, TD 40 KAE or TD 40 GFE. The two last are low-emission engines.

The machine has hydrostatic power transmission which means that a hydrostatic pump is fitted to the engine and this pump transfers the power via oil pressure to a hydrostatic motor. The hydrostatic motor is fitted to a gearbox of the Power Shift type where all gear wheels are in constant mesh. The gearbox designation is HST-75.

Front and rear axles have fully floating drive shafts with planetary type gears in the hubs. Front axle with a differential lock is optional.

The service brakes of the machine are wet type disc brakes. The service brakes are built integral with the planetary hub gears. The parking brake, of the drum brake type, is fitted on the front axle.

The machine is provided with a load-sensing variable displacement hydraulic pump which via a central valve provides oil to steering, brakes, servo and working hydraulics.

For further description of functions and components, see the respective sections.
