Stucke,2022-06-28 Two market experts deconstruct the drivers and inhibitors to innovation in the digital economy explain how large tech companies can stifle disruption assess the toll of their technologies on our well being and democracy and outline policy changes to take power away from big tech and return it to entrepreneurs Silicon Valley s genius combined with limited corporate regulation promised a new age of technological innovation in which entrepreneurs would create companies that would in turn fuel unprecedented job growth Yet disruptive innovation has stagnated even as the five leading tech giants which account for approximately 25 percent of the S P 500 s market capitalization are expanding to unimaginable scale and power In How Big Tech Barons Smash Innovation and How to Strike Back Ariel Ezrachi and Maurice E Stucke explain why this is happening and what we can do to reverse it While many distrust the Big Tech Barons the prevailing belief is that innovation is thriving online It isn t Rather than disruptive innovations that create significant value we are getting technologies that primarily extract value and reduce well being Using vivid examples and relying on their work in the field the authors explain how the leading tech companies design their sprawling ecosystems to extract more profits while crushing any entrepreneur that poses a threat As a result we get less innovation that benefits us and more innovations that surpass the dreams of yesteryears autocracies The Tech Barons technologies which seek to decode our emotions and thoughts to better manipulate our behavior are undermining political stability and democracy while fueling tribalism and hate But it s not hopeless The authors reveal that sustained innovation scales with cities not companies and that we as a society should profoundly alter our investment strategy and priorities to certain entrepreneurs Tech Pirates and cities infrastructure

Digital Innovation and Business Strategy** Karolin Hommel,2016-03-15 Seminar paper from the year 2015 in the subject Business economics Offline Marketing and Online Marketing grade 1 7 Sophia Antipolis Campus France SKEMA Business School language English abstract The German retailer REWE Markt emphasizes digital innovation in their business strategy to optimize its supply chain efficiency and to be first in new innovative solutions that attract customers in and off store off and online The following paper addresses digital

innovation practices of REWE Markt over the past years as well as its role within the retail industry that it takes in digital terms For 2016 one can expect new dynamics in the retail business in Europe Amazon announced in 2015 to introduce Amazon Fresh in some European countries Its online shopping service for fresh grocery will include delivery times less than twenty four hours after putting the order Competitors reactions have been for instance improved delivery times of only few hours after the order to outperform Amazon in advance E commerce is merely one of the big digital issues where retailers are forced to invest Connected with that is also a great logistic chain that has to be digitally coordinated in order to keep track on the demand and crowds of data that have to be processed Furthermore there are efforts to develop digital in store solutions for an improved shopping experience In the past years big traditional retail players have missed the chance to develop accordingly to the pace of technological developments Now where non traditional retail companies such as Amazon expand into grocery offerings as well as extent their logistical facilities they are finally in their wake up mode and grow their efforts to innovate digitally as this is a key competitive factor
