Scalable Pattern Recognition Algorithms Pradipta Maji, Sushmita Paul, 2014-03-19 This book addresses the need for a unified framework describing how soft computing and machine learning techniques can be judiciously formulated and used in building efficient pattern recognition models. The text reviews both established and cutting edge research providing a careful balance of theory, algorithms and applications with a particular emphasis given to applications in computational biology and bioinformatics. Features: integrates different soft computing and machine learning methodologies with pattern recognition tasks; discusses in detail the integration of different techniques for handling uncertainties in decision making and efficiently mining large biological datasets; presents a particular emphasis on real life applications such as microarray expression datasets and magnetic resonance images; includes numerous examples and experimental results to support the theoretical concepts described; concludes each chapter with directions for future research and a comprehensive bibliography. **Expert**

Systems Petrică Vizureanu, 2010-01-01 Expert systems represent a branch of artificial intelligence aiming to take the experience of human specialists and transfer it to a computer system. The knowledge is stored in the computer which by an execution system inference engine is reasoning and derives specific conclusions for the problem. The purpose of expert systems is to help and support user's reasoning but not by replacing human judgement. In fact, expert systems offer to the inexperienced user a solution when human experts are not available. This book has 18 chapters and explains that the expert systems are products of artificial intelligence branch of computer science that seeks to develop intelligent programs. What is remarkable for expert systems is the applicability area and solving of different issues in many fields of architecture, archeology, commerce, trade, education, medicine, to engineering systems, production of goods and control diagnosis problems in many industrial branches. **Rough-Fuzzy Pattern Recognition** Pradipta Maji, Sankar K. Pal, 2011-12-20 Learn how to

apply rough fuzzy computing techniques to solve problems in bioinformatics and medical image processing. Emphasizing applications in bioinformatics and medical image processing, this text offers a clear framework that enables readers to take advantage of the latest rough fuzzy computing techniques to build working pattern recognition models. The authors explain step by step how to integrate rough sets with fuzzy sets in order to best manage the uncertainties in mining large data sets. Chapters are logically organized according to the major phases of pattern recognition systems development, making it easier to master such tasks as classification, clustering and feature selection. *Rough Fuzzy Pattern Recognition* examines the important underlying theory as well as algorithms and applications, helping readers see the connections between theory and practice. The first chapter provides an introduction to pattern recognition and data mining, including the key challenges of working with high dimensional real life data sets. Next, the authors explore such topics and issues as Soft computing in pattern recognition and data mining. A mathematical framework for generalized rough sets incorporating the concept of fuzziness in defining the granules as well as the set Selection of non redundant and relevant features of real valued data sets.

Selection of the minimum set of basis strings with maximum information for amino acid sequence analysis Segmentation of brain MR images for visualization of human tissues Numerous examples and case studies help readers better understand how pattern recognition models are developed and used in practice This text covering the latest findings as well as directions for future research is recommended for both students and practitioners working in systems design pattern recognition image analysis data mining bioinformatics soft computing and computational intelligence
