Exercises in Architecture Simon Unwin, 2022-08-01 This revised edition of Exercises in Architecture Learning to Think as an Architect is full of new content building on the success of the previous edition All the original exercises have been revised and new ones added with the format changing to allow the inclusion of more supplementary material The aim remains the same to help pre or early course architecture students begin and develop their ability to think as architects Learning to do architecture is tricky It involves awakening abilities that remain dormant in most people It is like learning language for the first time a task made more mystifying by the fact that architecture deals not in words but in places places to stand to walk to sit to hide to sleep to cook to eat to work to play to worship This book was written for those who want to be architects It suggests a basis for early experiences in a school of architecture but it could also be used in secondary schools and colleges or as self directed preparation for students in the months before entering professional education Exercises in Architecture builds on and supplements the methodology for architectural analysis presented in the author's previous book Analysing Architecture the Universal Language of Place Making fifth edition 2021 and demonstrated in his Twenty Five Buildings Every Architect Should Understand Routledge 2015 Together the three books deal with the three aspects of learning any creative discipline 1 Analysing Architecture provides a methodology for analysis that develops an understanding of the way architecture works 2 Twenty Five Buildings explores and extends that methodology through analysis of examples as case studies and 3 Exercises in Architecture offers a way of expanding understanding and developing

fluency by following a range of rudimentary and more sophisticated exercises Those who wish to become professional architects wherever in the world they might be must make a conscious effort to learn the universal language of architecture as place making to explore its powers and how they might be used The exercises in this book are designed to help

Analysing Architecture Simon Unwin,2020-12-29 Now in its fifth edition Analysing Architecture has become internationally established as the best introduction to architecture Aimed primarily at those studying architecture it offers a clear and accessible insight into the workings of this rich and fascinating subject With copious illustrations from his own notebooks the author dissects examples from around the world and all periods of history to explain the underlying strategies in architectural design and show how drawing may be used as a medium for analysis In this new edition Analysing Architecture has been revised and expanded Notably the chapter on How Analysis Can Help Design has been redeveloped to clearly explain this crucially important aspect of study to a beginner readership Four new chapters have been added to the section dealing with Themes in Spatial Organisation on Axis Grid Datum Place and Hidden Material from the Case Studies in previous editions has been redistributed amongst earlier chapters The Introduction has been completely rewritten and the format of the whole book has been adjusted to allow for the inclusion of more and better illustrative examples Works of architecture are instruments for managing orchestrating modifying our relationship with the world around us They frame just about everything we do Architecture is complex subtle frustrating but ultimately extremely rewarding It can be a difficult discipline to get to grips with nothing in school quite prepares anyone for the particular demands of an architecture course But this book will help www.instagram.com/analysingarchitecture

Building Bridges Clare Kosnik,Simone White,Bethan Marshall,A. Lin Goodwin,Jean Murray,2016-07-15 Literacy learning continues to be central to schooling and is currently of major concern to educators policy developers and members of the public alike However the proliferation of communication channels in this digital era requires a fundamental re thinking of the nature of literacy and the pedagogy of literacy teaching and teacher education This text brings together papers by experts in teacher education literacy and information technology to help chart a way forward in this complex area Because of their background in teacher education the authors are realistic about what is appropriate and feasible they do not just jump on a technology bandwagon but they are also able to provide extended examples of how to embed technology in the practice of teacher education Taking a multi disciplinary perspective literacy teacher education and digital technology and informed by a range of empirical studies policy analyses and scholarly reflection this book makes a unique contribution to the literature on one of education s most pressing challenges how we prepare teachers of literacy at a time when understandings of literacy are expanding Chapters by leading researchers are complemented by those offering illuminating vignettes of practice that in turn provide opportunities for interrogation by the rich theoretical toolkit that characterizes the field The book is thoughtfully structured and manages a coherence that is rare in edited collections An impressive and heartening read Viv Ellis Professor of Education at Brunel University England and
