web seeded region growing abstract we present here a new algorithm for segmentation of intensity images which is robust rapid and free of tuning parameters the method however requires the input of a number of seeds either individual pixels or regions which will control the formation of regions into which the image will be segmented

matlab region growing algorithm giving improper results stack overflow - Apr 28 2022

web feb 11 2021 1 answer region growing is a very simple algorithm in short it says if the next pixels is less than reg maxdist in pixel value than the current pixel its part of the region otherwise its not your image is very smooth that means that pixel values change slowly in adjacent pixels thus region growing algorithms will take them in
