What a difference a year makes: 52 little weeks. This variation of the first line from Dinah Washington's famous song, which originally reads "What a difference a day makes 24 little hours," brings it to the point. According to all experts, the press, and most people, impression we are today in a serious economic recession. Less than one year ago, we practically lived on the island of the blessed, namely at Networking 2008, that was held on the island of Singapore or in the famous country where milk and honey flow or where wine and liquor flow. This convenient

situation has changed abruptly within less than 52 weeks It looks like the same kind of problems has emerged in all areas and the Networking area has of course been affected too Looking into the 2009 proceedings however you will immediately notice that the manuscripts are largely unaffected by any aspect of the economic crisis which should be a bit of a consolation Apparently research directions are dictated by a process that is all too sluggish in order to be quickly and radically changed by a tsunami Likewise the conference itself was prepared in spite of such a crisis *Introduction to Quantitative*
