## **Morning Routine Prices Returns:**

1998 **Econophysics and Sociophysics: Recent Progress and Future Directions** Frédéric Abergel, Hideaki Aoyama, Bikas K. Chakrabarti, Anirban Chakraborti, Nivedita Deo, Dhruv Raina, Irena Vodenska, 2017-01-11 This book presents the proceedings from ECONOPHYS 2015 an international workshop held in New Delhi India on the interrelated fields of econophysics and sociophysics which have emerged from the application of statistical physics to economics and sociology. Leading researchers from varied communities including economists sociologists financial analysts mathematicians physicists statisticians and others report on their recent work discuss topical issues and review the relevant contemporary literature. A society can be described as a group of people who inhabit the same geographical or social territory and are mutually involved through their shared participation in different aspects of life. It is possible to observe and characterize average behaviors of members of a society an example being voting behavior. Moreover the dynamic nature of interaction within any economic sector comprising numerous cooperatively interacting agents has many features in common with the interacting systems of statistical physics. It is on these bases that interest has grown in the application within sociology and economics of the tools of statistical mechanics. This book will be of value for all with an interest in this flourishing field.
