Coke adds life Just do it Yo quiero Taco Bell We live in a commercial age awash in a sea of brand names logos and advertising jingles not to mention commodities themselves Are shoppers merely the unwitting stooges of the greedy producers who will stop at nothing to sell their wares Are the producers powers of persuasion so great that resistance is futile James Twitchell counters this assumption of the used and abused consumer with a witty and unflinching look at commercial culture starting from the simple observation that we are powerfully attracted to the world of goods after all we don't call them bads He contends that far from being forced upon us against our better judgment consumerism is our better judgment Why Because increasingly store bought objects are what hold us together as a society doing the work of birth patina pews coats of arms house and social rank previously done by religion and bloodline We immediately understand the connotations of status and identity exemplified by the Nike swoosh the Polo pony the Guess label the DKNY logo The commodity alone is not what we are after rather we actively and creatively want that logo and its signification the social identity it bestows upon us As Twitchell summarizes Tell me what you buy and I will tell what you are and who you want to be Using elements as disparate as the film *The Jerk* French theorists popular bumper stickers and *Money* magazine to explore the nature and importance of advertising lingo packaging fashion and *The Meaning of Self* Twitchell overturns one stodgy social myth after another In the process he reveals the purchase and possession of things to be the self identifying acts of modern life Not only does the car you drive tell others who you are it lets you know as well The consumption of goods according to Twitchell provides us with tangible everyday comforts and with crucial inner security in a seemingly faithless age That we may find our sense of self through buying material objects is among the chief indictments of contemporary culture Twitchell however sees the significance of shopping There are no false needs We buy more than objects we buy meaning For many of us especially in our youth Things R Us *The Musician* ,1917

Hardwired: How Our Instincts to Be Healthy are Making Us Sick Robert S. Barrett,Louis Hugo Francescutti,2020-10-30

For the first time in a thousand years Americans are experiencing a reversal in lifespan Despite living in one of the safest and most secure eras in human history one in five adults suffers from anxiety as does one third of adolescents Nearly half of the US population is overweight or obese and one third of Americans suffer from chronic pain the highest level in the world In the United States fatalities due to prescription pain medications now surpass those of heroin and cocaine combined and each year 10% of all students on American college campuses contemplate suicide With the proliferation of social media and the algorithms for social sharing that prey upon our emotional brains inaccurate or misleading health articles and videos now

move faster through social media networks than do reputable ones This book is about modern health or lack of it The authors make two key arguments that our deteriorating wellness is rapidly becoming a health emergency and two that much of these trends are rooted in the way our highly evolved hardwired brains and bodies deal with modern social change The co authors a PhD from the world of social science and an MD from the world of medicine combine forces to bring this emerging human crisis to light Densely packed with fascinating facts and little told stories the authors weave together real life cases that describe how our ancient evolutionary drives are propelling us toward ill health and disease Over the course of seven chapters the authors unlock the mysteries of our top health vices why hospitals are more dangerous than warzones our addiction to sugar salt and stress our emotionally driven brains our relentless pursuit of happiness our sleepless society our understanding of risk and finally how world history can be a valuable tutor Through these varied themes the authors illustrate how our social lives are more of a determinant of health outcome than at any other time in our history and to truly understand our plight we need to recognize when our decisions and behavior are being directed by our survival seeking hardwired brains and bodies
