Supremacy Parmy Olson, 2024-09-10 WINNER OF THE THE FINANCIAL TIMES AND SCHRODERS 2024 BUSINESS BOOK OF THE YEAR AWARD In November of 2022 a webpage was posted online with a simple text box It was an AI chatbot called ChatGPT and was unlike any app people had used before It was more human than a customer service agent more convenient than a Google search Behind the scenes battles for control and prestige between the world's two leading AI firms OpenAI and DeepMind who now steers Google's AI efforts has remained elusive until now In Supremacy Olson tech writer at Bloomberg tells the astonishing story of the battle between these two AI firms their struggles to use their tech for good and

the hazardous direction they could go as they serve two tech Goliaths whose power is unprecedented in history The story focuses on the continuing rivalry of two key CEOs at the center of it all who cultivated a religion around their mission to build god like super intelligent machines Sam Altman CEO of OpenAI and Demis Hassabis the CEO of DeepMind Supremacy sharply alerts readers to the real threat of artificial intelligence that its top creators are ignoring the profit driven spread of flawed and biased technology into industries education media and more With exclusive access to a network of high ranking sources Parmy Olson uses her 13 years of experience covering technology to bring to light the exploitation of the greatest invention in human history and how it will impact us all Leading the Sustainable Organization Peter McAteer,2025-08-05

Never before have we been presented with the prospect of redesigning business at scale to create a more sustainable future for our planet and the people who inhabit it As we pass the midpoint of the Sustainable Development Goals 2015 2030 the world has changed There is not only more progress and policy but also more disagreement on the way forward The bottom line is that the shared goals developed in 2015 will not be met global warming will likely exceed targets and the collective challenge will be left to a new generation The book is organized as a series of business challenges and key questions that enable a transition from making legacy companies more carbon and waste efficient to operating in fundamentally new ways The vast majority of the new infrastructure the world will need by 2050 still needs to be built Those challenges will not be solved by legacy companies working to protect their market position in the face of a changing world The book offers a chapter by chapter guide to enable new leaders to turn challenges into opportunities **A Possible Relation Between the Crystalline Structure of Copper and Its Secondary Emission** Myrl Nelson Davis,1926 **Proceedings of the Child Conference for Research and Welfare** ,1910 **Gulf Coast Cattleman** ,1963 **The Billboard** ,1926 **Scientific American** ,1906 **Conference Proceedings** ,1996 **Billboard Music Week** ,1949-05 **British Bee Journal** ,1958
