Strategies for E-Commerce Data Security: Cloud, Blockchain, AI, and Machine Learning Goel, Pawan Kumar, 2024-08-22

In the landscape of e-commerce data security has become a concern as businesses navigate the complexities of sensitive customer information protection and cyber threat mitigation. Strategies involving cloud computing, blockchain technology, artificial intelligence, and machine learning offer solutions to strengthen data security and ensure transactional integrity. Implementing these technologies requires a balance of innovation and efficient security protocols. The development and adoption of security strategies is necessary to positively integrate cutting-edge technologies for effective security in online business.

Strategies for E-Commerce Data Security: Cloud, Blockchain, AI, and Machine Learning addresses the need for advanced security measures while examining the current state of e-commerce data security. It explores strategies such as cloud computing, blockchain, artificial intelligence, and machine learning. This book covers topics such as cybersecurity, cloud technology, and forensics and is a useful resource for computer engineers, business owners, security professionals, government officials, academicians, scientists, and researchers.

Integration of Internet of Things and Machine Learning Mudassir Khan, Fahimuddin Shaik, Shaik Karimullah, Suman Lata Tripathi, 2026-02-19. The book highlights the importance of using machine learning algorithms for smart intelligent devices, security, and privacy issues of the Internet of Things. Features: Discusses comprehensively topics such as sensor data collection, data preprocessing, feature extraction, and model training. Offers simplified explanations of algorithms like neural networks, decision trees, and clustering techniques, making them accessible to readers with limited technical background. Showcases practical insights by presenting real-world applications of the Internet of Things and machine learning in domains such as smart homes, healthcare, transportation, and manufacturing. Covers issues such as data quality, model overfitting, security vulnerabilities, and scalability. Includes tutorials on setting up Internet of Things devices, collecting and preprocessing data, and building machine learning models. The text is primarily written for senior undergraduates, graduate students, and academic researchers in electrical engineering, electronics, and communications engineering, computer science, and engineering and information technology.

Exploring Generative AI for Collaborative Robots in Agriculture 6.0 Reddy C., Kishor Kumar, Saju, Binju, Hulus, Asegul, Sibaliya, Tatjana, Nakouri, Haifa, 2025-08-08. The integration of generative artificial intelligence (AI) with collaborative robotics marks a transformation in Agriculture 6.0, characterized by hyper-automation, real-time decision making, and intelligent decentralized farming systems. As agricultural operations face pressure to enhance productivity, sustainability, and adaptability, the collaboration between generative AI and robotics offers promising solutions. By enabling machines to perform tasks and learn, adapt, and co-create strategies alongside human workers, generative AI reveals new opportunities for precision farming, crop monitoring, and resource management. Further exploration into these advanced technologies may reshape agricultural practices, drive innovation, and support a more resilient and efficient food production ecosystem.
