**Building Node Applications with MongoDB and Backbone** Mike Wilson, 2012-12-24 Build an application from backend to browser with Node.js and kick open the doors to real time event programming. With this hands on book you'll learn how to create a social network application similar to LinkedIn and Facebook but with a real time twist. And you'll build it with just one programming language JavaScript. If you're an experienced web developer unfamiliar with JavaScript, the book's first section introduces you to the project's core technologies: Node.js, Backbone.js and the MongoDB data store. You'll then launch into the project: a highly responsive, highly scalable application guided by clear explanations and lots of code examples. Learn about key modules in Node.js for building real time apps. Use the Backbone.js framework to write clean browser code and maintain better data integration with MongoDB. Structure project files as a foundation for code that will arrive later. Create user accounts and learn how to secure the data. Use Backbone.js templates to build the application's UIs and integrate access control with Node.js. Develop a contact list to help users link to and track other accounts. Use Socket.io to create real time chat functionality. Extend your UIs to give users up to the minute information.
