Global University Rankings and the Mediatization of Higher Education Michelle Stack,2016-04-12 Higher Education Institutions simultaneously critique and participate in national and international rankings of universities. However this creates a difficult situation since if universities do participate in rankings they acquiesce to a system based in media logics that has little to do with academic norms of research. If they do not participate in the rankings they risk losing public funding students and donors in an increasingly competitive and globalized environment. This book delves into the influence of journalists business tycoons and multinational corporations in defining what world class is and how it will be measured. Rankings provide us with a rich study for understanding how universities define deploy and manage their assets and liabilities in a mediatized globalized economy

Images of Intellectual Capital Jan Fazlagić, 2017-01-06

Intellectual capital (IC) became a hot topic in economic discussion at the turn of this century, believed to offer new principles which could help build the new intangible economy after the collapse of the Soviet Union and the Internet revolution. The early enthusiasm of the 2000s has slightly subsided today, however, though many of the underlying assumptions relating to the importance of intangible assets are still valid. As such, it is much more appropriate today to discuss issues related to IC as images of intellectual capital rather than rules. Intellectual capital explains a plethora of phenomena in today's business organisations and this book takes a post-modern approach to the issue of IC and offers a selection of different perspectives. They include analyses of intellectual capital in education, business and in the public sector. The chapters collected here are authored by university professors, business practitioners and students and investigate such issues as the relative importance of intellectual capital components to tangible components of a company's
