How to Go to College on a Shoe String

Ann Marie O'Phelan, 2008. Once again in 2006, the cost to attend college was double the inflation rate according to the report Trends in College Pricing 2006. The average rate of tuition at four-year private colleges was about 21,235; four-year public universities average 5,491. Tuition costs of course are just the beginning; now add room and board. The cost of attending a private college is 29,026 per year on average and 12,127 at four-year public universities. Take a look at IVY league universities such as Princeton, and the total fees will climb to nearly 37,000. An 8% college inflation rate means that the cost of college doubles every nine years. For a baby born today, this means that college costs will be more than three times current rates when the child is ready for college. The average debt for graduating college seniors who borrow to finance their undergraduate degree is just under 20,000. But there is good news: There is more financial aid available than ever before, over 134 billion. And despite all of these college cost increases, a college education remains an affordable choice for most families. Armed with the information detailed in this comprehensive book, you will be privy to over 2,200 programs that offer scholarships, internships, or loans to more than 1.7 million students each year. These are scholarships, grants, and loan programs that you have never heard of, for example, The Millennium Scholarship Offers 10,000 to students who have lived in Nevada for at least two years before they graduate from high school.
