Tips To Follow The 30-Day Walking Plan

1. Slow is a stroll - approx 25 minutes/mile. Use this easy pace to warm up.
2. Moderate is a normal walking pace - 20 minutes/mile. You can still talk as you walk.
3. Fast is walking at a brisk pace where you're pushing yourself - 17 minutes/mile.
4. Complete sessions in one go or split into 2
5. Repeat a week if you find it too hard.
6. If the plan is too easy increase the intensity of your walks with intervals or hills.

Secular Meditation-Based Ethics of Responsibility (MBER) Program Helene Hagège, 2022-12-09 An ethical solution to the current health ecological and financial problems we face is to mobilize our responsibility by overcoming our duality with the environment. It calls for changes in attitudes and behaviors that are not self-evident and can be facilitated by specific learning. Mindfulness-based interventions (MBI) are increasingly used in professional settings, particularly in therapy, because their effectiveness in terms of change is increasingly supported by scientific evidence. This book presents a detailed program aimed at developing an ethics of responsibility known as Mindfulness or Meditation-Based Ethics of Responsibility (MBER). It combines theoretical explanations, exercises, and secular meditations to propose rather than impose ethical guidelines accompanying participants in identifying their own ethical values, acting in accordance with them while weakening their dual functioning.

Routine Miracles Conrad Fischer, 2009-10-30 This book covers medical advances that would once have been called miracles but have now become routine. The patients' stories within this book yield hope, optimism, and triumph. This is the best time ever to come out of medical school and training. This fact will inspire and uplift everyone in the medical profession as well as all of us who must at some point rely on the art of medicine to see us through. Conrad Fischer MD: What has ruined today's medical students' interest in devoting their lives to finding cures for the most rampant diseases riddling our population? How can young doctors not be energized and excited by modern breakthroughs? Why are they not inspired by the ability of current AIDS drugs to increase life expectancy by twenty-five years? In *Routine Miracles*, award-winning internist and medical educator Conrad Fischer investigates the disconnect between medical advances and the rise of physician dissatisfaction. Fischer surveyed more than 3,000 physicians and interviewed hundreds of patients to uncover the seeds of doctors' discontent. Based upon his findings, he offers a deeply personal and compelling call to action for all of us, doctor and patient alike, to celebrate the present and the future of medicine.
