[Changing Media, Homes and Households](#) Deborah Chambers, 2016-04-14 Media technologies have played a central role in shaping ideas about home life over the last two centuries. *Changing Media, Homes and Households* explores the complex relationship between home, householders, families and media technologies by charting the evolution of the media-rich home from the early twentieth century to the present. Moving beyond a narrow focus on media texts, production and audiences, Deborah Chambers investigates the physical presence of media objects in the home and their symbolic importance for home life. The book identifies the role of home-based media in altering relationships between home, leisure, work and the outside world in the context of entertainment, communication and work. It assesses whether domestic media are transforming or reinforcing traditional identities and relations of gender, generation, class and migrancy. Mediatisation theory is employed to assess the domestication of media and

media saturation of home life in the context of wider global changes. The author also develops the concept of media imaginaries to explain the role of public discourses in shaping changing meanings, values and uses of domestic media. Framed within these approaches four chapters also provide in-depth case studies of the processes involved in media's home adoption: early television, design, family centred video gaming, the domestication of tablet computers and the shift from smart homes to today's connected homes. This is an ideal text for students and researchers interested in media and cultural studies.

communication and sociology    **GenTech** Rick Chomey, 2020-02-04 A social historian examines the use of technology in modern U.S. history and offers a different way to group American generations. The G.I. Generation, Silents, Baby Boomers, Gen Xers, Millennials, Generation Z. Every generation has its label and box. But the real question is Why Enter GenTech? It's a whole new way to look at American generations. Instead of the conventional fixed and linear dates for generational cohorts, Dr. Rick Chomey proposes a fresh understanding that's fluid and more of a loop rooted to the technology each generation experiences in their coming of age years. Since 1900 there has been more technological change than in all of previous combined history. The airplane, The automobile, Radio, Television, Nuclear energy, Rockets, Internet, Cellphones, Robots. Furthermore, there's a massive cultural shifting unlike anything witnessed since the Dark Ages gave way to the Renaissance, Reformation, Enlightenment, Scientific and Industrial Ages. Consequently, postmodern generations born since 1960 have grown up in a new cyber, wireless and visual high tech culture that's forever changed how we do business, learn, socialize, broadcast, entertain and worship. It's technology that shapes us, gives every generation its personality and seeds who we'll become tomorrow. GenTech opens a whole new perspective on how to view the world and understand why every generation matters. Praise for GenTech: Whether you're a technology nerd or wizard, this intriguing book will help you connect the digital dots. You'll see how technology is profoundly shaping our culture and you like it or not. Plus, you'll discover how technology affects each generation differently for better or worse. Thom Schultz, co-author of Don't Just Teach, Reach.
